JOURNAL OF THE air pollution control ASSOCIATION

11-Year Index
volumes 5-15

This supplement to the May 1966 issue of the Journal of the Air Pollution Control Association fills a long-recognized need for an index to authors and titles published since May of 1955. (Authors and titles for Volumes 1 through 4 appear in Volume 1 Number 1 of the APCA Abstracts, June 1955, copies of which are available from the Air Pollution Control Association at $1.00 for members, $2.00 for non-members.)

The author index, appearing on pages 1 through 15, lists authors alphabetically and their works chronologically.

The title index, appearing on pages 16 through 25, is subdivided into nine broad classifications with titles listed alphabetically in each category.

This eleven-year index is presented primarily as a reference aid. However, copies of the articles cited can be obtained from the Air Pollution Control Association, 4400 Fifth Avenue, Pittsburgh, Pennsylvania 15213, either as tearsheets at rates shown above or, if tearsheets are not available, as photocopies at $.50 per page.

THE JOURNAL OF AIR POLLUTION CONTROL ASSOCIATION is published monthly with editorial and executive offices at 4400 Fifth Avenue, Pittsburgh, Pa. 15213

Subscription price for non-profit libraries and institutions in U.S., Canada and Mexico $15 per year, for other countries $20 per year. For all others $50 per year.

AUTHOR INDEX

Aase, G. D. The estimation of air pollution emissions in a regional air pollution control district. 10(4) 285–291

Adams, D. F. Further application of the limed filter paper technique in fluorine air pollution studies. 7(2) 88–91

——. An automatic atmospheric fluoride analyzer. 9(3) 160–168

——. An air pollution phytotron. 11(10) 470–476

——. A field evaluation of the Mini-Adak II automatic, fluoride air pollutant analyzer. 12(4) 164–169

——. Ozone analysis with the Mini-Adak II. 13(2) 88–90

——. Recognition of the effects of fluorides on vegetation. 13(8) 360–362

——. Analysis of kraft-mill, sulfur-containing gases with GLC ionization detectors. 15(1) 31–33

——. European air pollution, 1964. 15(8) 375–378

Adams, R. L. Application of baghouses to electric furnace fume control. 14(8) 299–302

Adrian, R. C. Design of afterburners for varnish cookers. 10(2) 161–168

Akerlow, E. V. Modifications to the Fontana open hearth precipitators. 7(1) 39–43

Algren, A. B. The ASHAE air-borne dust survey. 7(3) 157–165

Allen, D. R. Air pollution effects of incinerator firing practices and combustion air distribution. 8(4) 297–308

Alley, F. C. The effect of temperature on photochemical oxidant production in a bench scale reaction system. 11(12) 581–584

——. The effect of pressure on photochemical oxidant production. 12(10) 464–467

——. Sampling and mass spectrometer analysis of reaction products from the photochemical decomposition of various olefins. 15(5) 235–238

——. Apparent rate constants and activation energies for the photochemical decomposition of various olefins. 15(8) 348–350

Altshuller, A. Thermodynamic considerations in the interactions of nitrogen oxides and oxyacids in the atmosphere. 6(2) 97–99

——. Gas chromatographic analysis of hydrocarbons in the Los Angeles atmosphere. 13(2) 81–87

——. Spectrophotometric analysis of aldehydes in the Los Angeles atmosphere. 13(3) 109–111

——. Effects of HC/NO_x ratios on irradiated auto exhaust, Part II. 14(5) 176–183

——. Plastic containers for sampling and storage of atmospheric hydrocarbons prior to gas chromatographic analysis. 14(10) 407–408

Anderson, D. O. Community studies of the health effects of air pollution—a critique. 15(12) 587–593

Anderson, R. B. The oxidation of hydrocarbons on simple oxide catalysts. 10(4) 275–281

——. Chromium catalysts for oxidizing automotive exhaust. 14(4) 113–117

Annis, J. C. The ASHAE air-borne dust survey. 7(3) 157–165

Antler, M. The effects of air pollution on electric contacts. 13(9) 405–415

Appleman, H. A note on the effect of aircraft exhaust on airport visibility. 6(1) 10

Arch, Arnold. Executive Secretary's membership report. 15(9) 439

Atkisson, A. A. The air pollution disaster-prevention program of Los Angeles county. 8(1) 72–80

——. National motor vehicle contaminant requirements. 12(5) 234–243

——. Research and test facilities of the Los Angeles county air pollution control district. 13(3) 112–115

Baker, R. A. Catalytic reduction of nitrogen oxides in automobile exhaust. 14(10) 409–413

Balestrieri, S. The detection and estimation of parts per billion concentrations of hydrocarbons. 15(4) 177–178

——. Studies of the gas chromatographic determination of mercaptans. 15(5) 215–217

Ball, K. E. Continuous parts per billion recorder for air contaminants. 10(6) 423–426

Ballard, T. A. An apparatus for quantitative studies of inhaled aerosol by dosimetric procedure. 6(2) 69–71

Ballman, H. C. Local air pollution control programs—a survey and analysis. 13(10) 486–495

Banduni S. J. Oxidation of black liquor by air under pressure. 12(1) 34–37

Banner, A. P. Disposal of coal tar pitch distillate obtained from carbon baking furnace by catalytic combustion. 13 (12) 610–612

Barad, M. L. An analysis of diffusion measurements. 8(1) 65–67

Barlage, W. B., Jr. Sampling and mass spectrometer analysis of reaction products from the photochemical decomposition of various olefins. 15(5) 235–238

Barnebey, H. L. Determination of organic vapor concentration in air. 7(2) 86–87

Barnes, D. O. Continuous parts per billion recorder for air contaminants. 10(6) 423–426

Barnes, D. P. Evaluation of air pollution data. 14(4) 107–109

——. A practical relationship between government and industry. 15(10) 465–466

Barnhart, D. H. Control of nitrogen oxides in boiler flue gases by two-stage combustion. 10(5) 397–408

Barr, M. D. Industrial responsibilities in and advantages from the control of air pollution. 10(3) 226–233

Barry, P. J. Planning an environmental survey for a nuclear power plant. 11(1) 14–18

Bartlett, F. E. The variation of effluent concentrations during temperature inversions. 7(3) 194–197

——. A preliminary evaluation of gas air tracers. 15(3) 109–112

Basse, B. Venturi scrubbers for cleaning cupola gases. 6(4) 218–219

Baulch, D. M. The variation with height of the dust loading over a city as determined from the atmospheric turbidity. 12(10) 492–496

——. Relation of gustiness to sulfur dioxide concentration. 12(11) 539–542

Begeman, C. R. The automotive contribution to air-borne polynuclear aromatic hydrocarbons in Detroit. 15(3) 113–122

Beiser, F. R. Cleaning sinter plant gas with venturi scrubber. 15(2) 46–50

Bell, F. A., Jr. Meaningful air quality measurements on a limited budget. 13(3) 127–131

Bellamy, A. W. Sampling for airborne radioactivity. 5(1) 1–4

Bellar, T. Chemical methodology in auto exhaust studies. 12(6) 294–297

——. Dynamic irradiation chamber tests of automotive exhaust, Part II. 12(11) 522–523

——. Gas chromatographic analysis of hydrocarbons in the Los Angeles atmosphere. 13(2) 81–87

——. Effects of HC/NO_x ratios on irradiated auto exhaust, Part II. 14(5) 176–183

Belyea, H. A. Air pollution administrative trends—the Canadian scene. 14 (12) 500–502

Bender, M. The clean air act and its implications for training requisite personnel. 15(12) 573–575

Benedict, H. M. The determination of the fluoride content of natural vegetation. 6(4) 239–242

——. Sampling atmospheric fluorides with glass fiber filters. 13(8) 374–377

——. Some responses of vegetation to atmospheric fluorides. 15(6) 253–255

Benline, A. J. Co-operating for cleaner air. 12(6) 291–293

Bennett, P. A. Some effects of engine-fuel variables on exhaust gas hydrocarbon content. 5(2) 109–119

Benson, F. B. Improving the dynamic response of continuous air pollutant measurements with a computer. 15(1) 19–22

Benson, H. E. Cost estimates of liquid-scrubbing processes for removing of sulfur dioxide from flue gases. 7(2) 109–114

Bergsma, D. Public health responsibilities in air pollution. 6(2) 103

Berry, C. R. Differences in concentrations of surface oxidant between valley and mountaintop conditions in the southern Appalachians. 14(6) 238–239

Bersin, R. L. Monitoring atmospheric SO_2 employing inverse radioactive tracers. 12(3) 129–146

Best, G. E. Air pollution administrative control—a local responsibility. 11(4) 155–156

Bieberdorf, F. W. Vegetation symptoms as a measure of air pollution. 10(3) 222–225

Bienstock, D. Bench-scale investigation on removing sulfur dioxide from flue gases. 10(2) 121–125

——. Evaluation of dry processes for removing sulfur dioxide from power plant flue gases. 15(10) 459–464

Billings, C. E. Pilot plant studies of a continuous slag-wool filter for open-hearth fume. 5(3) 159–166

——. Methods of generating solid aerosols. 6(2) 76–83

——. Further investigations of the continuous slag wool filter. 8(1) 53–64

——. Simultaneous removal of acid gases, mists, and fumes with mineral wool filters. 8(3) 185–202

——. Shock wave cleaning of air filters. 10(4) 318–326

——. Dark smoke during unpredictable load changes. 12(7) 324–325 & 349

——. Aerosol sampling for electron microscopy. 12(12) 586–590

Bishop, C. A. Successful cleaning of open-hearth exhaust gas with a high-energy venturi scrubber. 11(2) 83–87

Blanchard, V. J. Quantitative determination of formaldehyde in the parts per hundred million concentration level. 15(3) 106–108

Blommer, E. J. The influence of cold on mortality from Streptococci following ozone exposure. 15(11) 523–524

Bodurtha, F. T., Jr. A technique for the rapid solution of an air-pollution equation. 5(2) 127–131

——. The behavior of dense stack gases. 11(9) 431–437

Bolze, C. Automobile exhaust and smog formation. 7(1) 9–12

Bonamassa, F. Research and test facilities of the Los Angeles county air pollution control district. 13(3) 112–115

Bonn, D. E. Air pollution control of smoke house emission in the packing industry. 7(1) 36–38

Boubel, R. W. Benzo(a)pyrene production during controlled combustion. 13(11) 553–557

——. Oxides of nitrogen and unburned hydrocarbons produced during controlled combustion. 15(6) 270–273

Bowerman, F. R. Engineering waste disposal to prevent air pollution. 5(1) 10–12

——. Waste disposal without air pollution. 10(1) 54–57

Boyer, H. K. Eye irritation from air pollution. 10(1) 17–20

Bozek, J. W. Application of infrared spectroscopy to exhaust gas analysis. 5(2) 75–83

Bradley, W. R. Air pollution control is good business. 9(2) 115–119

Bradt, P. A study of dustfall on the basis of replicated latin square arrangements of various types of collectors. 13 (10) 461–466

Brandt, C. S. Environmental irradiation test facility. 10(4) 331–335

——. Government sponsored air pollution research relating to agriculture. 11(5) 248–250

Braverman, M. M. The use of the von brand filtering recorder in the evaluation of incinerators and smoke abatement devices. 8(2) 120–123

——. Continuous determination of carbon monoxide and hydrocarbons in air by a modified infrared analyzer. 9(2) 110–114

——. Spectrographic trace analysis of air-borne particulates. 11(9) 408–409

——. The contribution to air pollution by pigeons. 12(12) 570–571

Bravo, A. H. Variation of different pollutants in the atmosphere of Mexico City. 10(6) 447–449

Breivogel, M. Air pollution-potential advisory service for industrial zoning cases. 11(7) 327–335

Brennan, Eileen. Investigation of SO$_2$ effects on rubber trees as a means of forestalling injury to Malayan plantations from refinery emissions. 14(6) 229–233

Breslow, L. Epidemiological aspects of air pollution. 9(3) 129–132

Brewer, G. L. Odor control for kettle cooking. 13(4) 167–169

Brewer, R. F. Damage to vegetation from polluted atmospheres. 8(1) 9–15

Brief, R. S. Properties and control of electric-arc steel furnace fumes. 6(4) 220–223

——. Lead, carbon monoxide and traffic. 10(5) 384–388

——. Impingement baffle plate scrubber for flue gas. 14(9) 372–377

Briggs, G. A. A plume rise model compared with observations. 15(9) 433–438

Brightman, I. J. Air pollution and health: new facts from New York state. 12(6) 275–281

Brink, J. A., Jr. New equipment and techniques for sampling chemical process gases. 13(4) 162–166

——. Practical applications of stacks to minimize pollution problems. 14(11) 449–454

Broering, L. C. Objective odor pollution control investigations. 10(6) 441–446

Brousaides, F. J. Monitoring atmospheric SO$_2$ employing inverse radioactive tracers. 12(3) 129–146

Brubacher, M. L. A test procedure for motor vehicle exhaust emissions. 12(11) 505–509

Brunn, L. M. Cost estimates of liquid-scrubbing processes for removing of sulfur dioxide from flue gases. 7(2) 109–114

Bryan, F. R. A continuous flow method of determining unburned fuel in automotive exhaust. 6(1) 38–40

Bryan, R. J. Instrumentation for an ambient air animal exposure project. 13(6) 254–265

——. A comparison study of various types of ozone and oxidant detectors which are used for atmospheric air sampling. 15(8) 351–354

Buchberg, H. Preliminary design investigation of controlled environment systems for air pollution studies. 8(4) 285–292

Burleson, F. R. The production of pure peroxyacyl nitrates. 15(3) 87–89

Burlin, R. M. Emissions from underground gasoline storage tanks. 13(11) 524–530

Butler, G. B. Test of "fiberfrax" ceramic fibers for high temperature gas filtration. 6(2) 61–68

Byrd, J. F. Demonstration-syringe odor measurement technique. 7(1) 58–59

——. Solving a major odor problem in a chemical process. 14(12) 509–516

Byrne, J. L. The determination of the fluoride content of natural vegetation. 6(4) 239–242

Calvert, S. An air pollution rating index system. 12(4) 185–186

——. Collection of small particles in baffled conduits. 12(7) 326–331

——. The role of an air pollution advisory board. 14(6) 234–237

Campbell, W. W. Successful cleaning of open-hearth exhaust gas with a high-energy venturi scrubber. 11(2) 83–87

——. Development of an electric-furnace dust-control system. 12(12) 574–577

Cannon, W. A. Engine variables and their effects on exhaust gas composition. 5(2) 65–70

Caplan, J. D. The automobile manufacturers vehicle emissions research program. 13(3) 105–108

Cardiff, E. The effect of light on predisposing plants to ozone and PAN damage. 13(9) 423–428

——. The production of pure peroxyacyl nitrates. 15(3) 87–89

——. Apparent photosynthesis as a measure of air pollution damage. 15(4) 171–174

Carpenter, S. B. Adaptation of titrilog for field mobile sampling. 5(4) 195–196

——An interim report on full-scale study of dispersion of stack gases. 11(2) 60–65

——. Stacks—how high? 13(5) 198–204

Cefis, F. Experimental studies of the conditions of exposure to carcinogens for lung cancer induction. 15(1) 23–25

Cember, H. Method for tracing the ground-level distribution of stack gas emissions. 7(4) 262–265

Chambers, L. A. The long range effect of industrial air-pollution on the purity of air masses nation-wide. Is the mass self-cleaning? 5(3) 142–143

——. Exhaust composition in relation to fuel composition. 11(4) 178–186

Chandler, J. M. Engine variables and their effects on exhaust gas composition. 5(2) 65–70

Chao, J. Continuous measurement of oxides of nitrogen in auto exhaust. 14(7) 249–254

Chapman, H. M. Experience with selected air pollution control installations in the Bethlehem Steel Company. 13(12) 604–606

Chapman, R. L. An inspection method for automobile hydrocarbon emission. 10(6) 463–464

——. Flame ionization hydrocarbon analyzer. 11(10) 467–469

——. Effect of sampling system temperature on total hydrocarbons measurement in auto exhaust. 13(11) 535–537

Chapman, S. The collection of silica fume with an electrostatic precipitator. 8(1) 45–52

Charles, H. Monitoring of fluoride content of air, water, and vegetation. 11(2) 66–70

Chass, R. L. The air pollution disaster-prevention program of Los Angeles County. 8(1) 72–80

——. Contaminant emissions from the combustion of fuels. 10(1) 34–43

——. Total air pollution emissions in Los Angeles County. 10(5) 351–366

——. An evaluation of natural gas as a means of reducing industrial air pollution. 12(4) 155–163

——. Contribution of solvents to air pollution and methods for controlling their emissions. 13(2) 64–72

——. Emissions from underground gasoline storage tanks. 13(11) 524–530

Cherniack, I. A comparison study of various types of ozone and oxidant detectors which are used for atmospheric air sampling. 15(8) 351–354

Chipman, J. C. Study of the distribution and effects of auto exhaust gases. 5(2) 84–90

——. Proportional sampling system for the collection of an integrated auto exhaust gas sample. 10(1) 60–59

Cholak, J. The concentration of ozone in the atmosphere of certain American cities. 5(4) 227–232

——. The lead content of the atmosphere. 11(6) 281–288

Christy, W. G. History of the air pollution control association. 10(2) 126–142

Clark, J. M. Measurement of diesel engine emissions. 12(11) 516–521

Clarke, J. F. A simple diffusion model for calculating point concentrations from multiple sources. 14(9) 347–352

Clarkson, Diana. The California control program for motor vehicle created air pollution. 12(1) 22–28

Claydon, C. R. The radial distribution of sulfur dioxide source strength and concentration in Nashville. 11(11) 529–534

Clemens, C. A. Plastic containers for sampling and storage of atmospheric hydrocarbons prior to gas chromatographic analysis. 14(10) 407–408

Cocks, G. G. Research on control of emissions from Bessemer converters. 11(3) 103–113

Coffin, D. L. The influence of cold on mortality from Streptococci following ozone exposure. 15(11) 523–524

Cohn, S. H. The preparation and biological application of airborne simulants of fallout from nuclear detonation. 7(1) 20–25

Cole, A. F. W. The concurrent determination of sulfur dioxide and nitrogen dioxide in the atmosphere. 7(1) 25–28

Cole, W. H. Design and performance characteristics of high-velocity high-efficiency air cleaning precipitators. 10(3) 239–245

Collins, F. C. Fume problems in electric smelting and contributions to their solution. 5(3) 157–158

Collins, G. F. A preliminary evaluation of gas air tracers. 15(3) 109–112

Colucci, J. M. The automotive contribution to air-borne polynuclear aromatic hydrocarbons in Detroit. 15(3) 113–122

Committees. See list of committees at end of Author Index.

Communications Counselors, Inc. Stainless steel anti-smog mufflers cut air pollution. 9(2) 83–84

Compton, C. R. Waste disposal without air pollution. 10(1) 54–57

——. Nitric acid manufacture. 14(3) 91–93

——. Air pollution control in connection with DDT production. 14(3) 94–95

TI-3 Petroleum Committee The petroleum refining industry—air pollution problems and control methods. 14(1) 30–33

T-4 Coal Committee (Now TI-4). The disposal of coal refuse. 6(2) 105–110

TI-5 Public Utilities Committee. Atmospheric pollution problems of the public utility industry. 10(4) 292–295

——. Recommendations for day-to-day monitoring of atmospheric pollution control effectiveness. 11(8) 387–399

——. Preliminary action to stimulate, recommend, and foster co-operative research within the public utility industry. 12(12) 584–585

——. Informative air pollution problems in fly ash sintering plant. 15(3) 123–124

——. The bag filterhouse for oil-fired power plants. 15(4) 179–180

TI-6 Steel Committee. Dust problems in blast furnace operation. 7(1) 62–67

——. Air pollution problems of the steel industry. 10(3) 208–218

TI-7 Committee. Air pollution problems of the foundry industry. 11(4) 157–172

——. Informative reports on foundry air pollution. 11(5) 233–240

TI-8 Technical Committee. Lead and arsenic report. 10(4) 296

TR-2 Air Pollution Measurements Committee. Recommended standard method for continuing dustfall survey (APM 1-a). 5(3) 177–181

——. Recommended standard methods for continuing air monitoring for fine particulate matter. 13(9) 397–404

——. Recommended standard methods for continuing air monitoring for gaseous contaminants. 15(7) 313

——. Recommended standard method for continuing air monitoring for hydrogen sulfide ultramicrodetermination of sulfides in the air. 15(7) 314–315

TITLE INDEX

For the convenience of the reader, this index has been subdivided into nine broad classifications, with titles listed alphabetically within each category. The groupings are as follows:

1. The Sources and Nature of Air Pollution
2. The Transport of Air Pollution
3. The Effects of Air Pollution
4. Controlling Air Pollution
5. Methods of Measurement
   (sampling, detection, evaluation, techniques, testing)
6. Survey Results and Interpretation
7. The Law and Air Pollution
   (legislation, administration, enforcement, standards, programs)
8. Creating a Climate for Control
   (public relations, management concepts)
9. Technical Reports from Conferences and Committees
   (not otherwise classified)

1. THE SOURCES AND NATURE OF AIR POLLUTION

Air pollutant emissions from coal-fired power plants; report no. 1. S. T. Cuffe, R. W. Gerstle, A. A. Orning, and C. H. Schwartz. 14(9) 353–362

Air pollutant emissions from coal-fired power plants, report no. 2. S. T. Cuffe, R. W. Gerstle, A. A. Orning, and C. H. Schwartz. 15(2) 59–64

Air pollution aspects of waste disposal. Technical committee TA-2 (APCA). 10(4) 297–302

Air pollution effects of incinerator firing practices and combustion air distribution. A. H. Rose, Jr., R. L. Stenburg, M. Corn, R. R. Horsley, D. R. Allen, and P. W. Kolp. 8(4) 297–308

Air pollution from coal refuse disposal areas. V. H. Sussman, and J. J. Mulhern. 14(7) 279–284

Air pollution from fluorides. C. R. Williams. 6(2) 100–102

Air pollution from the grain industry. M. E. McLouth and H. J. Paulus. 11(7) 313–317

Air pollution problems of the foundry industry. Committee TI-7 (APCA). 11(4) 157–172

Air pollution problems of the steel industry. Technical committee TI-6 (APCA). 10(3) 208–218

An air pollution rating index system. S. Calvert. 12(4) 185–186

Allergenic air pollutants in New Orleans. H. Weill, M. M. Ziskind, R. C. Dickerson, and V. J. Derbes. 15(10) 467–471

Analysis of automotive exhaust gas. W. J. King, K. Wilson, and D. J. Swartz. 12(1) 5–21

Apparent rate constants and activation energies for the photochemical decomposition of various olefins. F. C. Alley, G. B. Martin, and W. H. Ponder. 15(8) 348–350

The atmospheric dust problem. W. L. Faith. 14(1) 27–29

Atmospheric emissions from oxidation pounds. R. Y. Nelson and J. O. Ledbetter. 14(2) 50–52

Atmospheric photochemical reactions of halogens and butyl halides. M. Levine, W. F. Hamilton, and E. Simon. 14(6) 220–223

Atmospheric pollution problems of the public utility industry. Technical committee TI-5 (APCA). 10(4) 292–295

Atmospheric pollution: the role played by combustion processes. E. W. Grohse and L. E. Saline. 8(3) 255–266

Attitudes on the design of flue-fed incinerators. M. Sterling. 10(2) 110–113

Auto exhaust: composition and photolysis products. E. R. Stephens, P. L. Hanst, R. C. Doerr, and W. E. Scott. 8(4) 333–335

Automobile exhaust—gas aerosols. G. J. Doyle and J. L. Jones. 13(8) 365–367

Automobile exhaust particulates—source and variation. H. C. McKee and W. A. McMahon, Jr. 10(6) 456–462

Automobile exhaust and smog formation. W. Faith, J. T. Goodwin, F. V. Morriss, and C. Bolze. 7(1) 9–12

The automotive contribution to air-borne polynuclear aromatic hydrocarbons in Detroit. J. M. Colucci and C. R. Begeman. 15(3) 113–122

Background of design criteria for municipal incinerators—the designer's view. S. A. Greeley. 6(3) 133–138

The beneficiation of raw materials in the steel industry and its effect upon air pollution control. J. M. Uys and J. W. Kirkpatrick. 13(1) 20–27

Benzo(a)pyrene production during controlled combustion. R. W. Boubel and L. A. Ripperton. 13(11) 553–557

Brush and trunk burning plant in the city of Detroit. M. Sterling. 15(12) 580–582

The chemical and biological consideration of atmospheric carcinogenic agents. H. L. Falk and P. Kotin. 7(1) 12–14

The chemical industry's air pollution problem. TI-2 chemical committee (APCA). 10(2) 169–171

Chemical industry report. TI-2 chemical committee (APCA). 13(10) 496–499

The chemical nature of the particulate in irradiated automobile exhaust. N. A. Renzetti and G. J. Doyle. 8(4) 293–296

The chemistry of the oxides of nitrogen in the upper atmosphere. L. E. Miller. 8(2) 138–146

A comparison of various sources of automotive emissions. H. C. McKee and K. D. Mills. 11(11) 516–522

The composition of exhaust gases from diesel, gasoline, and propane powered motor coaches. M. A. Elliott, G. J. Nebel, and F. G. Rounds. 5(2) 103–108

Composition of natural fresh air. A. Turk and C. J. D'Angio. 12(1) 29–33

Contaminant emissions from the combustion of fuels. R. L. Chass and R. E. George. 10(1) 34–43

Comments on contaminant emissions from the combustion of fuels. H. H. Sonderling. 10(1) 44

The contribution of the open burning of land clearing debris to air pollution. M. Feldstein, S. Duckworth, H. C. Wohlers, and B. Linsky. 13(11) 542–545

Contribution of solvents to air pollution and methods for controlling their emissions. R. L. Chass, C. V. Kanter, and J. H. Elliott. 13(2) 64–72

The contribution to air pollution by pigeons. M. M. Braverman, C. Theophil, F. Masciello, and C. Smith. 12(12) 570–571

Dark smoke during unpredictable load changes. C. E. Billings and P. Drinker. 12(7) 324–325 & 349

The December smog. A. Marsh. 13(8) 384–387

Design criteria for municipal incinerators—the customer's view. A. Michaels. 6(3) 139–143

Diesel exhaust composition and odor studies. R. H. Linnell and W. E. Scott. 12(11) 510–515

The disposal of coal refuse. T-4 coal committee (APCA). 6(2) 105–110

Domestic gas-fired incinerators. F. E. Vandaveer. 5(4) 197–198

Dust problems in blast furnace operation. TI-6 steel committee (APCA). 7(1) 62–67

Effects of HC/NO$_x$ ratios on irradiated auto exhaust, part II. P. W. Leach, L. J. Lage, T. A. Bellar, J. E. Sigsby, Jr., and A. P. Altshuller. 14(5) 176–183

Effects of high volatile fuel on incinerator effluents. R. L. Stenburg, R. P. Hangebrauck, D. J. Von Lehmden, and A. H. Rose, Jr. 11(8) 376–383

Effects of hydrocarbon to oxides of nitrogen ratios on irradiated auto exhaust, part I. M. W. Korth, A. H. Rose, Jr., and R. C. Stahman. 14(5) 168–175

The effect of nucleating particulates on photochemical aerosol formation. A. Goetz and R. F. Pueschel. 15(3) 90–95

The effects of operating variables on automotive hydrocarbons emissions. R. Lawrence, III, E. Elsevier, and L. A. Ripperton. 14(4) 126–129

The effect of pressure on photochemical oxidant production. F. C. Alley and L. A. Ripperton. 12(10) 464–467

The effect of temperature on photochemical oxidant production in a bench scale reaction system. F. C. Alley and L. A. Ripperton. 11(12) 581–584

Emissions from organic solvent usage in Los Angeles County. R. G. Lunche, A. Stein, C. J. Seymour, and R. L. Weimer. 7(4) 275–283

Emissions from underground gasoline storage tanks. R. L. Chass, R. G. Holmes, A. P. Fudurich, and R. M. Burlin. 13(11) 524–530

Emission of fluorides from industrial processes. K. T. Semrau. 7(2) 92–108

Emissions of polynuclear hydrocarbons and other pollutants from heat-generation and incineration processes. R. P. Hangebrauck, D. J. Von Lehmden, and J. E. Meeker. 14(7) 267–278

Engine variables and their effects on exhaust gas composition. J. M. Chandler, W. A. Cannon, J. C. Neerman, and A. Rudolph. 5(2) 65–70

European air pollution, 1964. D. F. Adams. 15(8) 375–378

An evaluation of environmental odors. W. F. Kerka and E. R. Kaiser. 11(4) 297–301

Exhaust composition in relation to fuel composition. R. E. Neligan, P. P. Mader, and L. A. Chambers. 11(4) 178–186

Field evaluation of combustion air effects on atmospheric emissions from municipal incinerators. R. L. Stenburg, R. P. Hangebrauck, D. J. Von Lehmden, and A. H. Rose, Jr. 12(2) 83–89

Formation and control of sulfur oxides in boilers. TA-9 committee (APCA). 12(12) 567–569

The formation of aerosols by irradiation of dilute auto exhaust. G. J. Doyle and N. A. Renzetti. 8(1) 23–31

The formation of ozone in the Los Angeles atmosphere. F. E. Littman, H. W. Ford, and N. Endow. 6(3) 171–175

The formation of ozone in polluted atmospheres. L. M. Richards. 5(4) 216–218

Free radicals and their relations to reactions in the atmosphere. R. J. Cvetanovic. 14(6) 208–212

Fume problems in electric smelting and contributions to their solution. M. O. Sem and F. C. Collins. 5(3) 157–158

Further effects of temperature and pressure on photochemical oxidant production. W. J. Jacumin and L. A. Ripperton. 14(3) 96–97

Impact of changing patterns of energy use on community air quality. A. N. Heller and D. F. Walters. 15(9) 423–428

Incinerator furnace temperature. H. G. Meissner. 11(10) 479–482

Informative air pollution problems in fly ash sintering plant. TI-5 public utilities committee (APCA). 15(3) 123–124

Informative reports on foundry air pollution. TI-7 committee (APCA). 11(5) 233–240

An inventory of automobile gases. D. H. Hutchison and F. R. Holden. 5(2) 71–74

Lead and arsenic report. Technical committee TI-8 (APCA). 10(4) 296.

Lead, carbon monoxide and traffic. R. S. Brief, A. R. Jones, and J. D. Yoder. 10(5) 384–388

The lead content of the atmosphere. J. Cholak, L. J. Schafer, and T. D. Sterling. 11(6) 281–288

Liberation of pyrite from steam coals. R. A. Glenn and R. D. Harris. 12(8) 388–395

Light and dark phase oxidant production in a non-urban atmosphere. L. A. Ripperton. 11(9) 425–427

Manufacture of chlorine and sodium hydroxide. TI-2 chemical industry committee (APCA). 14(3) 88–90

Natural phenomena in air pollution. J. C. Schwegmann. 14(2) 48–49

The nature, sources, and fate of air contaminants. W. L. Faith. 13(10) 483–485

The new refuse incinerator of L. von Roll A.-G. R. Tanner. 12(6) 285–290

Nitric acid manufacture. TI-2 chemical industry committee (APCA). 14(3) 91–93

Nitrogen oxides, combustion and engine deposits. R. S. Spindt, C. L. Wolfe, and D. R. Stevens. 6(3) 127–132

Operating characteristics and economics of a 100 cu. ft./day incinerator for radioactive wastes. W. A. Rodger and D. C. Hampson. 6(1) 41–43

Oxides of nitrogen in diesel exhaust. J. Harkins and J. K. Goodwine. 14(1) 34–38

Oxides of nitrogen and unburned hydrocarbons produced during controlled combustion. R. W. Boubel and L. A. Ripperton. 15(6) 270–273

Particulate sulfates in Pittsburgh air. M. Corn and L. Demaio. 15(1) 26–30

Pesticides in urban atmospheres. E. C. Tabor. 15(9) 415–418

The petroleum refining industry—air pollution problems and control methods. TI-3 committee (APCA). 14(1) 30–33

Photochemistry and smog. A. J. Haagen-Smit. 13(9) 444–446

Plants pollute air. S. Goren. 9(2) 105–109

Polynuclear hydrocarbon emissions from selected industrial processes. D. J. Von Lehmden, R. P. Hangebrauck, and J. E. Meeker. 15(7) 306–312

A preliminary survey of hydrocarbon-derived oxygenated material in automobile exhaust gases. K. J. Hughes and R. W. Hurn. 10(5) 367–373

The preparation and biological application of airborne simulants of fallout from nuclear detonation. S. H. Cohn, W. B. Lane, J. C. Sherwin, J. K. Gong, and L. Weisbecker. 7(1) 20–25

The present status of composting and its air pollution aspects. R. F. McCauley. 6(4) 233–236

The problems of applying incinerator criteria. E. M. Voelker. 14(9) 363–365

Process for disposal of organic residues. R. G. Woodland, M. C. Hall, and R. R. Russell. 15(2) 56–58

The production of pure peroxyacyl nitrates. E. R. Stephens, F. R. Burleson, and E. A. Cardiff. 15(3) 87–89

A radiotracer study of the production of formaldehyde in the photo-oxidation of ethylene in the atmosphere, part I. S. W. Nicksic, J. Harkins, and B. A. Fries. 14(5) 158–160

A radiotracer study of the production of formaldehyde in the photo-oxidation of ethylene in the atmosphere, part II. S. W. Nicksic, J. Harkins, and B. A. Fries. 14(6) 224–228

Reactions involving ozone, nitrogen dioxide and organic compounds at low concentrations in air. P. L. Hanst, E. R. Stephens, and W. E. Scott. 5(4) 219–225

Recent developments in the study of the organic chemistry of the atmosphere. E. R. Stephens, W. E. Scott, P. L. Hanst, and R. C. Doerr. 6(3) 159–164

Relation of benzene soluble organic matter to suspended particulate matter in the atmosphere. E. C. Tabor and D. H. Fair. 11(9) 403–407

Report on diesel smoke. TA-10 vehicular exhaust committee (APCA). 13(6) 290–291

Report on garbage composting. Engineering society of Detroit. 6(4) 237–238

Review of recent studies of sulfur oxides as air pollutants. M. D. Thomas. 14(12) 517–520

The role of engine blowby in air pollution. A. H. Rose, Jr. and R. C. Stahman. 11(3) 114–117

Role of motor vehicle exhausts in smog formation. W. L. Faith. 7(3) 219–221

A simplified method for characterizing a motor vehicle's exhaust emissions. A. M. Smith and J. H. Struck. 11(5) 251–253

Some aspects of marine air pollution problem on the Great Lakes. TI-1 marine committee (APCA). 14(9) 378–384

Some data and observations on combustion of gaseous effluents from baked lithograph coatings. A. Wallach. 12(3) 109–110

Some effects of engine-fuel variables on exhaust gas hydrocarbon content. F. G. Rounds, P. A. Bennett, and G. J. Nebel. 5(2) 109–119

Some factors affecting the concentration of oxides of nitrogen in exhaust gases from spark ignition engines. G. J. Nebel and M. W. Jackson. 8(3) 213–219

Sources and control of sulfur-bearing pollutants. H. W. Nelson and C. L. Lyons. 7(3) 187–193

Sources and kinds of contaminants from motor vehicles. TA-10 vehicular exhaust committee (APCA). 14(8) 327–328

Studies on gasoline engine exhaust. D. Hoffmann and E. L. Wynder. 13(7) 322–327

Studies on sulfuric acid mist downwind from a sulfuric acid manufacturing plant. J. W. Kerrigan and K. Snajberk. 15(7) 316–319

A study of effluents from back-yard incinerators. J. E. Yocom, C. M. Hein, and H. W. Nelson. 6(2) 84–89

Summer sun—Cincinnati smog: a recent incident. L. E. Niemeyer. 13(8) 381–383

Survey of gas-fired incinerators. G. B. Uicker. 5(4) 199–202

Technical manual on single retort underfeed stokers. APCA technical co-ordinating committee TA-6. 9(3) 145–156

Test methods for determining emission characteristics of incinerators. TA-3 incinerator committee (APCA). 15(3) 127–135

Thermodynamic considerations in the interactions of nitrogen oxides and oxyacids in the atmosphere. A. Altshuller. 6(2) 97–99

Unsolved problems with flue-fed incinerators. E. R. Kaiser. 11(5) 254–257

2. TRANSPORT OF AIR POLLUTION

Air pollution potential forecasts—a year's experience. M. E. Miller and L. E. Niemeyer. 13(5) 205–210

Airflow related to Denver air pollution. L. W. Crow. 14(2) 56–59

An analysis of diffusion measurements. M. L. Barad. 8(1) 65–67

Atmospheric diffusion formulae and practical pollution problems. M. E. Smith. 6(1) 11–13

Atmospheric dispersal of industrial stack gases determined by concentration measurements in scale model wind tunnel experiments. G. H. Strom, M. Hackman, and E. J. Kaplin. 7(3) 198–202

Atmospheric dispersion over longer travel distances. G. R. Hilst. 11(5) 241–242

The behavior of dense stack gases. F. T. Bodurtha, Jr. 11(9) 431–437

The chemistry of the oxides of nitrogen in the upper atmosphere. L. E. Miller. 8(2) 138–146

A comparison of observed plume rises with values obtained from well-known formulas. H. Moses and G. H. Strom. 11(10) 455–466

The development of a forecasting service for use in air pollution control. T. W. Kleinsasser and R. C. Wanta. 6(4) 228–232

Differences in concentrations of surface oxidant between valley and mountaintop conditions in the southern Appalachians. C. R. Berry. 14(6) 238–239

Diffusion of vented gas around buildings. J. Halitsky. 12(2) 74–80

Dispersion and effects of air borne fluorides in central Florida. E. R. Hendrickson. 11(5) 220–232

Dispersion of stack gases in stable atmospheres. G. R. Hilst. 7(3) 205–210

Economics, engineering and air pollution in the design of large chimneys. F. Nelson and L. Shenfeld. 15(8) 355–361

Economics, engineering and air pollution in the design of large chimneys—an addendum. F. Nelson and L. Shenfeld. 15(11) 536–537

The effect of meteorological variables upon radon concentration three feet above the ground. H. Moses, H. F. Lucas, Jr., and G. A. Zerbe. 13(1) 12–19

Effects of topography on winds and diffusion conditions at the national reactor testing station. E. M. Wilkins. 6(1) 14–16

Effects of vertical temperature difference on soiling index. E. H. Markee, Jr. 11(3) 118–120

An experimental study of ragweed pollen penetration. A. N. Dingle and E. W. Hewson. 8(1) 16–22

An interim report on full-scale study of dispersion of stack gases. F. E. Gartrell, F. W. Thomas, and S. B. Carpenter. 11(2) 60–65

Long range cloud diffusion in the lower atmosphere. B. P. Leonard, Jr. 9(2) 77–82

The long range effect of industrial air-pollution on the purity of air masses nationwide. Is the mass self-cleaning? L. A. Chambers. 5(3) 142–143

Meteorological considerations in air quality planning. J. M. Leavitt. 10(3) 246–250

Meteorological factors affecting causes and controls of air pollution. E. W. Hewson. 5(4) 235–243

Meteorological tools for air pollution control. M. E. Smith. 14(3) 80–82

Meteorological tools in evaluating and reducing effects in air pollution. D. H. Pack. 14(3) 83–85

Prepared discussion on "Meteorological tools." A. C. Stern. 14(3) 86–87

The meteorologically scheduled open burn. S. Duckworth. 15(6) 274–277

Meteorology and air pollution problems in industry. G. V. Williamson. 14(3) 78–79

Meteorology as related to reactor-site selection. F. D. White and D. H. Pack. 6(3) 151–153

A method of estimating the field of instantaneous ground concentration from tower bivane data. B. Davidson and J. Halitsky. 7(4) 316–319

An objective method for site evaluation. I. A. Singer. 10(3) 219–221

On the transport of atomic debris in the atmosphere. R. J. List. 5(3) 153–156

Peak to mean pollutant concentration ratios for various terrain and vegetation cover. I. A. Singer, K. Imai, and R. G. Del Campo. 13(1) 40–42

A plume rise model compared with observations. G. A. Briggs. 15(9) 433–438

Pollen sampling and dispersion studies at Brookhaven National Laboratory. G. S. Raynor, M. E. Smith, I. A. Singer, and E. C. Ogden. 11(12) 557–561

The prediction of the rise of a hot cloud from field experiments. I. A. Singer, J. A. Frizzola, and M. E. Smith. 14(11) 455–458

Preliminary analysis of project prairie grass diffusion measurements. F. A. Record and H. E. Cramer. 8(3) 240–248

Relation of gustiness to sulfur dioxide concentration. D. M. Baulch. 12(11) 539–542

The relationship between peak and mean concentrations. I. A. Singer. 11(7) 336–341

Relationships between 24-hour mean air quality measurements and meteorological factors in Nashville, Tennessee. D. B. Turner. 11(10) 483–489

A simple diffusion model for calculating point concentrations from multiple sources. J. F. Clarke. 14(9) 347–352

A technique for the rapid solution of an air-pollution equation. F. T. Bodurtha, Jr. 5(2) 127–131

The utilization of optimum meteorological conditions for the reduction of Los Angeles automotive pollution. E. K. Kauper and Charlotte J. Hopper. 15(5) 210–213

Valley wind phenomena and air pollution problems. B. Davidson. 11(8) 364–368

The variation of effluent concentrations during temperature inversions. M. E. Smith, I. A. Singer, F. E. Bartlett, and L. Marcus. 7(3) 194–197

The variation with height of the dust loading over a city as determined from the atmospheric turbidity. R. A. McCormick and D. M. Baulch. 12(10) 492–496

Vertical temperature profiles in relation to other meteorological elements and to air pollution. D. E. Jenne. 7(1) 31–35

Weather data for air pollution—available, analyzed and inexpensive. R. H. Frederick. 14(2) 60–65

3. EFFECTS OF AIR POLLUTION

Air pollution damage to vegetation. M. Katz and V. C. Shore. 5(3) 144–150

Air pollution and health. R. H. Wilson. 9(1) 20–21

Air pollution and health: general description of a study in Nashville, Tennessee. L. D. Zeidberg, J. J. Schueneman, P. A. Humphrey, and R. A. Prindle. 11(6) 289–297

Air pollution and health: new facts from New York State. I. J. Brightman, A. Rihm, Jr., and S. W. Samuels. 12(6) 275–281

Air pollution and total environmental health. N. K. Post and A. F. Layton. 13(6) 272–273

Air quality criteria and standards for agriculture. J. T. Middleton, L. O. Emik, and O. C. Taylor. 15(10) 476–480

Apparent photosynthesis as a measure of air pollution damage. O. C. Taylor, E. A. Cardiff, and J. D. Mersereau. 15(4) 171–173

Atmospheric sampling for aldehydes and eye irritation in Los Angeles smog—1960. N. A. Renzetti and R. J. Ryan. 11(9) 421–424

Automobile paint damaged by airborne iron particles. E. G. Fochtman and G. Langer. 6(4) 243–245

A brief review of the public health service air pollution program. S. M. Rogers. 12(7) 318–321

Bronchial asthma associated with air pollutants from the grain industry. D. W. Cowan, H. J. Thompson, H. J. Paulus, and P. W. Mielke, Jr. 13(11) 546–552

Community studies of the health effects of air pollution—a critique. D. O. Anderson and B. G. Ferris, Jr. 15(12) 587–593

Criteria for the evaluation of chemical toxicity. F. Princi. 14(5) 154–157

Damage to vegetation from polluted atmospheres. J. T. Middleton, E. F. Darley, and R. F. Brewer. 8(1) 9–15

The deterioration of materials in polluted atmospheres. J. E. Yocom. 8(3) 203–208

Dispersion and effects of air borne fluorides in central Florida. E. R. Hendrickson. 11(5) 220–232

Economics of air pollution effects versus cost of control. W. L. Faith. 13(8) 363–364

Effect of air pollutants on dyed fabrics. V. S. Salvin. 13(9) 416–422

Effects of air pollution on the atmospheric corrosion behavior of some metals and alloys. E. A. Tice. 12(12) 553–559

The effects of air pollution on electric contacts. M. Antler and J. Gilbert. 13(9) 405–415

Effect of exhaust gas recirculation on automotive ring wear. R. D. Kopa, R. G. Jewell, and R. V. Spangler. 12(5) 246–254

Effects of fluorine compounds on vegetation with special reference to sweet corn. A. E. Hitchcock, L. H. Weinstein, D. C. McCune, and J. S. Jacobson. 14(12) 503–508

Effects of inorganic fluorides on animals. J. W. Suttie. 14(11) 461–464

The effect of light on predisposing plants to ozone and PAN damage. W. M. Dugger, Jr., O. C. Taylor, C. R. Thompson, and E. Cardiff. 13(9) 423–428

The effects of a low ethylene concentration on the growth of cotton. W. W. Heck, E. G. Pires, and W. C. Hall. 11(12) 549–556

Engineering the chronic exposure of animals to laboratory produced automobile exhaust. R. G. Hinners. 12(11) 527–530

Environment simulation for studying the effects of air pollutants on computers. T. W. Steading. 15(3) 99–101

Environmental conditions affecting the use of plants as indicators of air pollution. G. Seidman, I. J. Hindawi, and W. W. Heck. 15(4) 168–170

Epidemiological aspects of air pollution. J. R. Goldsmith and L. Breslow. 9(3) 129–132

The Erie County air pollution—respiratory function study. W. Winkelstein, Jr. 12(5) 221–222

Evaluation of the hazards of ozone and oxides of nitrogen—factors modifying toxication. H. E. Stockinger. 8(2) 129–137

Evaluation of vegetation injury as an air pollution criterion. M. Treshow. 15(6) 266–269

Experimental studies of the conditions of exposure to carcinogens for lung cancer induction. U. Saffiotti, F. Cefis, L. H. Kolb, and P. Shubik. 15(1) 23–25

Eye irritants formed during photo-oxidation of hydrocarbons in the presence of oxides of nitrogen. E. A. Schuck and N. A. Renzetti. 10(5) 389–392

Eye irritation from air pollution. C. H. Hine, M. J. Hogan, W. K. McEwen, F. H. Meyers, S. R. Mettier, and H. K. Boyer. 10(1) 17–20

Eye irritation from irradiated automobile exhaust (effect of irradiation intensity; half-life studies). E. A. Schuck and L. H. Rogers. 8(4) 310–313

A field investigation of fluorosis in cattle. H. C. Wohlers and G. W. Newell. 14(5) 139–148

Government sponsored air pollution research relating to agriculture. C. S. Brandt. 11(5) 248–250

The healthy environment. J. D. Porterfield. 11(4) 175–177

The hygienic aspects of the production and use of lead antiknock compounds. R. A. Kehoe. 13(7) 314–321
Incidence of mildew on painted surfaces. P. F. Klens and C. F. Koda. 5(4) 203–204
An index of air pollution and its relation to health. N. E. Manos and G. F. Fisher. 9(1) 5–11
The influence of cold on mortality from streptococci following ozone exposure. D. L. Coffin and E J. Blommer. 15 (11) 523–524
Instrumentation for an ambient air animal exposure project. R. J. Bryan. 13(6) 254–265
Interactions of environmental factors on the sensitivity of plants to air pollution. W. W. Heck, J. A. Dunning, and I. J. Hindawi. 15(11) 511–515
Investigating inhalation hazard using synthetic radioactive fallout. W. B. Lane. 9(2) 102–104
Investigation of SO_2 effects on rubber trees as a means of forestalling injury to Malayan plantations from refinery emissions. Eileen Brennan, Ida A. Leone, and R. H. Daines. 14(6) 229–233
The invisible injury theory of plant damage. M. D. Thomas. 5(4) 205–208
Materials deterioration and air pollution. J. B. Upham. 15(6) 265
Monitoring human exposures to sulfur dioxide in a body plethysmograph. Y. Tokiwa, B. R. Tamplin, and J. A. Nadel. 15(3) 96–98
Motorist exposures to aldehydes from diesel-powered buses. C. E. Schumann and C. W. Gruber. 14(2) 53–55
A note on the effect of aircraft exhaust on airport visibility. H. Appleman. 6 (1) 10
Plant injury induced by photochemical reaction products of propylene-nitrogen dioxide mixtures. W. W. Heck. 14 (14) 255–261
Preliminary observations on the relationship between eye irritation in synthetic systems and in the atmosphere. N. A. Renzetti and E. A. Schuck. 11(3) 121–124
Recognition of the effects of fluorides on vegetation. D. F. Adams. 13(8) 360–362
Recording the response of plants to various air pollutants. J. O. Ivie, M. D. Thomas, O. C. Taylor, C. R. Thompson, W. M. Dugger, Jr., and B. L. Richards. 13(8) 355–359
The relation of chronic lung disease to community type air pollution. P. Gross. 15(4) 160–161
Response of plants to air pollution. J. T. Middleton. 6(1) 7–9
A review of effects on animals of exposure to auto exhaust and some of its components. S. D. Murphy. 14(8) 303–308
Scientific basis for some medical air quality guides. L. Friberg and R. Rylander. 15(11) 531–534
Significance of atmospheric ozone as a phytotoxicant. B. L. Richards and O. C. Taylor. 15(5) 191–193
Smog effects and chemical analysis of the Los Angeles atmosphere. L. H. Rogers, N. A. Renzetti, and M. Neiburger. 6(3) 165–170
Some considerations in the interpretation of air pollution health effects data. R. A. Prindle. 9(1) 12–19
Some effects of atmospheric fluoride on plant metabolism. D. C. McCune, L. H. Weinstein, J. S. Jacobson, and A. E. Hitchcock, 14(11) 465–468
Some laboratory and epidemiological aspects of air pollution carcinogenesis. E. L. Wynder and D. Hoffman. 15 (4) 155–159
Some responses of vegetation to atmospheric fluorides. H. M. Benedict, J. M. Ross, and R. H. Wade. 15(6) 253–255
Status and redirection of research on the atmospheric pollutants toxic to field grown crops in southern California. B. L. Richards and O. C. Taylor. 11 (3) 125–128
Status report: study of vision obscuration by nonblack plumes. W. L. Crider and J. A. Tash. 14(5) 161–167
Studies on the carcinogenicity of gasoline exhaust. D. Hoffman, E. Theisz, and E. L. Wynder. 15(4) 162–165
Studies on the role of sulfur dioxide in visibility reduction. J. Harkins and S. W. Nicksic. 15(5) 218–221
Study of the distribution and effects of auto exhaust gases. G. P. Larson, J. C. Chipman, and E. K. Kauper. 5(2) 84–90
A survey of practices in regard to the air pollution aspects of "Dutch Elm" disease eradication. R. D. Cusumano and G. L. Wasser. 15(5) 230–234
The understanding of cause of disease. R. A. Prindle. 14(4) 123–125
Use of indexes of air pollution potential in mortality studies. R. Schiffman and E. Landau. 11(8) 384–386
Use of plants for air pollution monitoring. E. F. Darley. 10(3) 198–219
Variations in air pollution and the incidence of respiratory disease. F. C. Dohan, G. S. Everts, and R. Smith. 12(9) 418–422
Vegetation symptoms as a measure of air pollution. H. C. McKee and F. W. Bieberdorf. 10(3) 222–225

4. CONTROLLING AIR POLLUTION

The adhesion of solid particles to solid surfaces, I. M. Corn. 11(11) 523–528
The adhesion of solid particles to solid surfaces, II. M. Corn. 11(12) 566–575
Adsorption of binary hydrocarbon mixtures on activated charcoal—molecular weight variation. F. Ore and R. W. Moulton. 5(1) 33–36
Air pollution abatement program of a chemical processing industry. F. B. Kaylor. 15(2) 65–67
Air pollution control by a sulfur dioxide scrubbing system. C. Lawler. 7(1) 29–30
Air pollution control and the gas industry. M. Sterling. 11(8) 354–361
Air pollution control in connection with DDT production. TI-2 chemical industry committee (APCA). 14(3) 94–95
Air pollution control in municipal incineration. J. W. Lenehan. 12(9) 414–417
Air pollution control measures for hot dip galvanizing kettles. E. E. Lemke, W. F. Hammond, and G. Thomas. 10(1) 70–76
Air pollution control of smoke house emission in the packing industry. N. Soderholm and D. E. Bonn. 7(1) 36–38
Air pollution control as seen by the electric light and power industry. G. T. Minasian. 11(6) 268–269
Air pollution resulting from incineration—its reduction and control. L. P. Flood. 9(1) 63–68
Air sanitation developments. L. B. Hitchcock. 12(5) 223–226
An analysis of mechanical shaking in air filtration. G. W. Walsh and P. W. Spaite. 12(2) 57–61
Application of baghouses to electric furnace fume control. R. L. Adams. 14 (8) 299–302
An approach to odor control. R. Pantaleoni. 5(4) 213–215
Automobile exhaust control devices. W. L. Faith. 13(1) 33–35
The automobile manufacturers vehicle emissions research program. J. D. Caplan. 13(3) 105–108
Automotive air pollution: a systems approach. S. L. Ridgway and J. C. Lair. 10(4) 336–340
The bag filterhouse for oil-fired power plants. TI-5 public utilities committee (APCA). 15(4) 179–180
A baghouse test program for oxygen lanced open hearth fume control. R. A. Herrick. 13(1) 28–32
Bench-scale investigation on removing sulfur dioxide from flue gases. D. Bienstock and F. J. Field. 10(2) 121–125
Black liquor oxidation as a method for reducing air pollution from sulfate pulping. E. R. Hendrickson and C. I. Harding. 14(12) 487–490
Catalytic reduction of nitrogen oxides in automobile exhaust. R. A. Baker and R. C. Doerr. 14(10) 409–413
Chemical engineering aspects of air pollution control. M. Sittenfield. 8(1) 68–71
Chromium catalysts for oxidizing automotive exhaust. J. J. Feenan, R. B. Anderson, H. W. Swan, and L. J. E. Hofer. 14(4) 113–117
Cleaning sinter plant gas with venturi scrubber. E. R. Harris and F. R. Beiser. 15(2) 46–49
The collection of metallurgical fumes from an oxygen lanced open hearth furnace. A. C. Elliott and A. J. Lafreniere. 14(10) 401–406
The collection of silica fume with an electrostatic precipitator. J. E. Yocom and S. Chapman. 8(1) 45–52
Collection of small particles in baffled conduits. S. Calvert and R. Hodous. 12(7) 326–331
Considerations of the feasibility of control of oxides of nitrogen. P. S. Tow. 7(3) 234–239
Contribution of solvents to air pollution and methods for controlling their emissions. R. L. Chass, C. V. Kanter, and J. H. Elliott. 13(2) 64–72
Control of air pollution at cominco operations. A. F. Snowball. 9(1) 54–58
Control of air pollution from the burning of insulated copper wire. E. R. Kaiser and J. Tolciss. 13(1) 5–11
Control of asphaltic concrete plants in Los Angeles County. R. M. Ingels, N. R. Shaffer, and J. A. Danielson. 10(1) 29–33
The control of atmospheric pollution. G. P. Larson. 5(4) 209–211
The control of effluents from municipal incinerators. R. D. Ellsworth and R. B. Engdahl. 7(1) 43–46
Control of emissions from the processing of noncombustible municipal refuse. J. N. Mitchell and S. G. Gillette. 5(1) 13–16
Control of fluoride emissions at Harvey Aluminum, Inc.—Soderberg Process Aluminum Reduction Mill. R. R. Ott and R. E. Hatchard. 13(9) 437–443
The control of gob pile fires. H. F. Hebley. 6(1) 29–31
Control of nitrogen oxides in boiler flue gases by two-stage combustion. D. H. Barnhardt and E. K. Diehl. 10(5) 397–408
Control of odors from a continuous soap making process. J. E. Molos. 11(1) 9–13
Control of organic emissions from surface coating operations. C. V. Kanter, J. H. Elliott, E. F. Spencer, Jr., N. Kayne, and M. F. Leduc. 10(1) 78–87
Control of vapors from bulk gasoline loading. I. S. Deckert, R. G. Lunche, and R. C. Murray. 8(3) 223–233

Controlling atmospheric contaminants in the smelting and refining of copper-base alloys. A. Stein, H. E. Schwartz, and L. E. Kallan. 5(1) 5–9

Controlling the flue-fed incinerator. R. J. MacKnight, J. E. Williamson, J. J. Sableski, Jr., and J. O. Dealy. 10(2) 103–109

Controlling odors from cattle feed lots and manure dehydration operations. R. Moorman, Jr. 15(1) 34–35

Corona quenching—its significance in electrical precipitation. W. T. Sproull. 13(12) 617–621

Correlation of dust scrubber efficiency. K. T. Semrau. 10(3) 200–207

Cost estimates of liquid-scrubbing processes for removing of sulfur dioxide from flue gases. J. H. Field, L. M. Brunn, W. P. Haynes, and H. E. Benson. 7(2) 109–114

Crankcase emission control devices for typical gasoline engines. TA-10 committee (APCA). 13(4) 173–174

Criteria for certification of motor vehicle pollution control devices in California. J. T. Middleton. 13(2) 78–80

Design of afterburners for varnish cookers. J. L. Mills, W. F. Hammond, and R. C. Adrian. 10(2) 161–168

Design and performance characteristics of high-velocity high-efficiency air cleaning precipitators. H. J. White and W. H. Cole. 10(3) 239–245

The design and performance of a bootstrapping direct flame afterburner. S. L. Ridgway and J. C. Lair. 12(7) 340–347

Determining impaction efficiencies of mist collection equipment. W. E. Ranz and E. J. Katz. 8(4) 328–332

Developments in solid fuel burning equipment in air pollution control. P. R. Grossman. 7(3) 222–226

The development of a condenser for odor control from dry rendering plants. W. Strauss. 14(10) 424–426

Development of an electric-furnace dust-control system. W. W. Campbell and R. W. Fullerton. 12(12) 574–577

Discharge electrodes and electrostatic precipitators. J. S. Lagarias. 10(4) 271–274

Disposal of coal tar pitch distillate obtained from carbon baking furnace by catalytic combustion. A. P. Banner and E. M. Ilgenfritz. 13(12) 610–612

Disposal of gaseous effluents from nuclear power plants. B. H. Hamling and G. F. Jenkins. 7(4) 256–261

The domestic gas-fired incinerator's role in air pollution control. F. E. Vandaveer. 6(2) 90–96

Dust and mist collection—critique on the state of the art. K. E. Lunde and C. E. Lapple. 7(4) 289–296

Dust retention efficiencies of dustfall collectors. J. S. Nader. 8(1) 35–38

Dust and mist collection—critique on the state of the art. K. T. Semrau. 13 (12) 587–594

Economics, engineering and air pollution in the design of large chimneys. F. Nelson and L. Shenfeld. 15(8) 355–361

Economics, engineering and air pollution in the design of large chimneys—an addendum. F. Nelson and L. Shenfeld. 15(11) 536–537

Economics of vapor recovery from storage tanks. C. A. Day. 5(1) 17–20

The effective collection of fly ash at pulverized coal-fired plants. J. Katz. 15(11) 525–528

Effectiveness of odor counteractants for the treatment of stack gases. M. W. First. 9(1) 28–30

Critique of the article: "Effectiveness of odor counteractants for the treatment of stack gases." A. Turk. 9(3) 157–159

Effects of design and fuel moisture on incinerator effluents. R. L. Stenburg, R. R. Horsley, R. A. Herrick, and A. H. Rose, Jr. 10(2) 114–120

Effect of fly ash characteristics on collector performance. H. J. White. 5(1) 37–50

The effects of mechanical equipment on controlling air pollution at no. 3 sintering plant, Indiana Harbor Works, Inland Steel Company. C. P. Frame and R. J. Elson. 13(12) 600–603

Electric furnace dust control system. G. A. Pettit. 13(12) 607–609

Electric furnace ferrosilicon fume collection. L. Silverman and R. A. Davidson. 6(1) 21–28

Electrostatic precipitator studies for open-hearth gas cleaning. R. G. Thompson, T. L. Myron, and C. J. Davis. 5(3) 139–141

Eliminating mechanical shaking of dust filter bags. R. E. Kunkle. 13(6) 274–277

Elimination of cooling tower fog from a highway. W. A. Hall. 12(8) 379–383

Energy and efficiency characteristics of the ejector venturi scrubber. L. S. Harris. 15(7) 302–305

Engineering design factors in dust and fume recovery systems. R. O'Mara and C. R. Flodin. 8(1) 39–44

Engineering and maintaining in-plant air pollution control. O. C. Thompson. 9(2) 94–95

Engineering, operation and maintenance of electrostatic precipitators on open hearth furnaces. R. L. Schneider. 13(8) 348–353

Engineering waste disposal to prevent air pollution. A. M. Rawn and F. R. Bowerman. 5(1) 10–12

Enhanced scrubbing of black liquor boiler fume by electrostatic pre-agglomeration: a pilot plant study. A. B. Walker. 13(12) 622–627

Evaluation of air cleaners for occupied spaces. K. T. Whitby, D. A. Lundgren, A. R. McFarland, and R. C. Jordan. 11(11) 503–515

An evaluation of catalytic and direct fired afterburners for coffee and chicory roasting odors. J. L. Sullivan, F. L. Kafka, and L. M. Ferrari. 15(12) 583–586

Evaluation of dry processes for removing sulfur dioxide from power plant flue gases. D. Bienstock, J. H. Field, S. Katell, and K. D. Plants. 15(10) 459–464

Evaluation of methods for controlling vehicular exhaust. W. Linville, R. G. Holmes, and C. V. Kanter. 10(1) 21–28

An evaluation of natural gas as a means of reducing industrial air pollution. S. S. Griswold, R. L. Chass, R. E. George, and R. G. Holmes. 12(4) 155–163

Exhaust control devices. M. P. Sweeney. 15(1) 13–18

Exhaust gas oxidation on vanadia-alumina catalysts. W. B. Innes and R. Duffy. 11(8) 369–375

Experiences in controlling atmospheric pollution encountered in pharmaceutical manufacturing processes. W. C. Johnson. 9(1) 32–41

Experience with selected air pollution control installations in the Bethlehem Steel Company. H. M. Chapman. 13(12) 604–606

Fiber glass fabric filters for high temperature dust and fume control. I. J. Gusman and R. C. Horton. 13(6) 266–267

Field evaluation of wet fiber filters for the treatment of air contaminants. M. W. First and R. P. Warren. 6(1) 32–34

Fifty years of electrostatic precipitation. H. J. White. 7(3) 166–177

Filters and filter media for the cement industry. R. F. O'Mara and C. R. Flodin. 9(2) 96–101

Flame photographs of light load combustion point the way to reduction of hydrocarbons in exhaust gas. J. T. Wentworth and W. A. Daniel. 5(2) 91–102

Foam fractionation of black liquor from sulfate pulping. C. I. Harding and E. R. Hendrickson. 14(12) 491–499

The Fulham-Simon-Carves process for the recovery of sulphur from flue gases. T. Kennaway. 7(4) 266–274

Fume control in a fertilizer plant—a case history. G. F. Sachsel, J. E. Yocom, and F. A. Retske. 6(4) 214–217

Fume filters for the roofing industry. E. Tonjes. 5(1) 21–22

Fundamentals of electrode rapping in industrial electrical precipitators. W. T. Sproull. 15(2) 50–55

Further investigations of the continuous slag wool filter. C. E. Billings, L. H. Levenbaum, C. Kurker, Jr., E. C. Hickey, and L. Silverman. 8(1) 53–64

Gas cleaning efficiency requirements for different pollutants. W. C. L. Hemeon. 12(3) 105–108

Glass fibers and their use as filter media. A. Marzocchi, F. Lachut, and W. H. Willis, Jr. 12(1) 38–42

The gravel bed filter—a new approach to gas cleaning. H. L. Engelbrecht. 15 (2) 43–45

Gravity settling of particles in a horizontal tube. J. W. Thomas. 8(1) 32–34

High temperature fabric filtration of industrial gases. P. W. Spaite, D. G. Stephan, and A. H. Rose, Jr. 11(5) 243–247

History of fly ash collection at the South Charleston plant, Union Carbide Corporation—Chemicals Division. M. N. Magnus. 15(4) 149–154

Impingement baffle plate scrubber for flue gas. R. S. Brief and A. Oiestad. 14(9) 372–377

Industrial odor control. J. Von Bergen. 8(2) 101–111

Industrial ovens designed for air pollution control. P. H. Goodell. 10(3) 234–238

Information required for selection of electrostatic and combination fly ash collectors; methods of analysis for chemical, physical, and electrical properties of fly ash. TA-5 dust, fumes, mists and fog collectors committee (APCA). 15(6) 256–260

Laboratory wind tunnel and model studies to improve gas velocity distribution in cottrell precipitators. W. T. Sproull. 10(4) 307–313

A management approach to odor control. R. H. Fink. 7(1) 57–58

Mechanical dust collectors. C. A. Gallaer and J. W. Schindeler. 13(12) 574–580

The mechanism of separation in the louver-type dust separator. M. J. Goglia and J. L. Smith, Jr. 5(1) 51–62

Merits of liquefied petroleum gas fuel for automotive air pollution abatement. D. J. Swartz, K. W. Wilson, and W. J. King. 13(4) 154–159

The meteorologically scheduled open burn. S. Duckworth. 15(6) 274–277

Methods of combatting air pollution in ferrous and non-ferrous foundries. H. J. Weber. 7(3) 178–181

Modifications to the fontana open hearth precipitators. E. V. Akerlow. 7(1) 39–43

Modifications to reduce emissions from a flue-fed incinerator. E. R. Kaiser, J. Halitsky, M. B. Jacobs, and L. C. McCabe. 10(3) 183–197

A multipurpose flare stack for control of chemical process wastes. J. F. Mellor, Jr. 10(6) 465–467

National motor vehicle contaminant control requirements. A. A. Atkisson, Jr. 12(5) 234–243
The new baghouse installation for cleaning smelter gases at Phelps Dodge Refining Corporation. D. L. Watts and J. F. Higgins. 12(5) 217–220
A new gas-liquid interphase reactor applied to air pollution control. F. L. Yerzley. 11(1) 19–23
New work in kraft mill odor control. R. H. Wright. 13(3) 101–104 & 136
Noncatalytic auto exhaust combustor. C. H. Worsham, R. B. Long, and J. P. Longwell. 11(3) 135–140
Objective odor pollution control investigations. N. A. Huey, L. C. Broering, G. A. Jutze, and C. W. Gruber. 10(6) 441–446
Odor abatement in the rendering and allied industries. A. J. Teller. 13(4) 148–149
Odor control at a 2,4-D production plant. T. B. Henshaw. 15(11) 516–518
Odor control for kettle cooking. G. L. Brewer. 13(4) 167–169
Odor control in cattle feed yards. W. L. Faith. 14(11) 459–460
Odor control with activated charcoal. N. R. Rowe. 13(4) 150–153
Odor and fallout control in a kraft pulp mill. G. A. Hansen. 12(9) 409–413
Oxidation of black liquor by air under pressure. A. A. Tirado, V. M. Guevara, and S. J. Banduni. 12(1) 34–37
The oxidation of hydrocarbons on simple oxide catalysts. K. C. Stein, J. J. Feenan, G. P. Thompson, J. F. Shultz, L. J. E. Hofer, and R. B. Anderson. 10(4) 275–281
Performance of a flue-fed incinerator. E. R. Kaiser, J. Halitsky, M. B. Jacobs, and L. C. McCabe. 9(2) 85–91
Performance test techniques for ejector venturi scrubber. L. S. Harris and R. Hartenbaum. 12(5) 227–231
The petroleum industries' air pollution control program. G. A. Lloyd. 11(1) 6–8
The petroleum refining industry—air pollution problems and control methods. TI-3 committee (APCA). 14(1) 30–33
Pilot plant studies of a continuous slagwool filter for open-hearth fume. C. E. Billings, W. D. Small, and L. Silverman. 5(3) 159–166
Practical applications of stacks to minimize pollution problems. J. A. Brink, Jr. and B. B. Crocker. 14(11) 449–454
Predicting the performance of cleanable industrial fabric filters. M. W. First and L. Silverman. 13(12) 581–586
Predicting performance of collectors in air pollution control. L. Silverman. 13(12) 573
Predicting performance of electrostatic precipitators. J. S. Lagarias. 13(12) 595–599
The prevention of air pollution damage to plants by the use of vitamin C sprays. H. T. Freebairn. 10(4) 314–317
A progress report on controlling atmospheric pollutants. G. P. Larson. 7(4) 302–307
Properties and control of electric-arc steel furnace fumes. R. S. Brief, A. H. Rose, Jr., and D. G. Stephan. 6(4) 220–223
Prospects for exhaust control by engine modification. A. C. Stern. 13(2) 91–92
Range of applicability of catalytic fume burners. H. R. Suter. 5(3) 173–176
Rating of dust collectors according to dust settling velocities. W. C. L. Hemeon, G. F. Haines, Jr., and S. D. Puntureri. 11(6) 264–267
Recovery of chlorine from air-chlorine mixtures. R. C. Sutter. 7(1) 30–31
Removal of bacteria from air streams by glass fiber filters. H. M. Decker, J. B. Harstad, and F. D. Lense. 7(1) 15–16
Removal of exhaust odors from solvent extraction operation by activated charcoal adsorption. TA-7 odor and gas treatment committee (APCA). 15(9) 422
Removal of halogens, carbon dioxide and aerosols from air in a spray tower. R. C. Liimatainen and W. J. Mecham. 6(1) 17–20
Removal of toxic gases in smog with metal filters. H. T. Freebairn. 13(5) 218–219
A research approach to the control of emissions from steelmaking processes. G. W. P. Rengstorff. 13(4) 170–172
Research on control of emissions from bessemer converters. A. R. Orban, J. D. Hummell, and G. G. Cocks. 11(3) 103–113
Scrubbing characteristics of the ejector venturi scrubber. L. S. Harris. 13(12) 613–616
Scrubbing of fume from combustion gases at efficiencies up to 99.98 percent. G. M. Hein and A. R. Orban. 11(5) 205–219
Shock wave cleaning of air filters. C. E. Billings, L. Silverman, R. Dennis, and L. H. Levenbaum. 10(4) 318–326
Simultaneous removal of acid gases, mists, and fumes with mineral wool filters. C. E. Billings, C. Kurker, Jr., and L. Silverman. 8(3) 185–202
Smog control in the steel industry. H. Dok. 5(1) 23–26
The smogless automobile. F. L. Hartley, C. C. Moore, and J. B. Gregory. 10(2) 143–146
Smokeless burning of automobile bodies. E. R. Kaiser and J. Tolciss. 12(2) 64–73
Smokeless stacks—industry's big problem. S. Vajda. 14(10) 415–417
Solving a major odor problem in a chemical process. J. F. Byrd, H. A. Mills, C. H. Schellhase, and H. E. Stokes. 14(12) 509–516
Some factors affecting fly-ash collector performance on large pulverized fuel-fired boilers. C. R. Flodin and H. H. Haaland. 5(1) 27–32
Some technical and economic aspects of residual fuel oil desulfurization. E. Z. Finfer. 15(10) 485–488
Sources and control of sulfur-bearing pollutants. H. W. Nelson and C. J. Lyons. 7(3) 187–193
Specifications required for design of electrostatic or combination mechanical-electrostatic collectors for fly ash collection from boiler gases. Electrostatic precipitation sub-committee of committee T-12 (APCA). 8(3) 249–254
Stacks—how high? F. W. Thomas, S. B. Carpenter, and F. E. Gartrell. 13(5) 198–204
Stainless steel anti-smog mufflers cut air pollution. Communications Counselors, Inc. 9(2) 83–84
Status report of cost factors in exhaust control. TA-10 vehicular exhaust committee (APCA). 14(10) 427–429
Status report on auto exhaust control research—1957. A. H. Rose, Jr. and D. G. Stephan. 7(2) 81–85
Studies of air pollution control by Southern California Edison Company. A. J. Haagen-Smit. 7(4) 251–255
A study of a multiple wet collector. E. Kristal, R. Dennis, and L. Silverman. 6(4) 204–213
Successful cleaning of open-hearth exhaust gas with a high-energy venturi scrubber. C. A. Bishop, W. W. Campbell, D. L. Hunter, and M. W. Lightner. 11(2) 83–87
Summary of the conference on odor control. A. C. Stern. 7(1) 53–54
A summary of the fly-ash disposal problem. H. H. Russell. 7(1) 46–47
System designs for the catalytic decomposition of nitrogen oxides. J. L. Donahue. 8(3) 209–212
Test of "Fiberfrax" ceramic fibers for high temperature gas filtration. M. W. First, J. B. Graham, G. B. Butler, C. B. Walworth, and R. P. Warren. 6(2) 61–68
The use of the Von Brand filtering recorder in the evaluation of incinerators and smoke abatement devices. I. Ettinger, M. M. Braverman, and M. B. Jacobs. 8(2) 120–123
The utilization of optimum meteorological conditions for the reduction of Los Angeles automotive pollution. E. K. Kauper and Charlotte J. Hopper. 15(5) 210–213
Venturi scrubbers for cleaning cupola gases. B. Basse. 6(4) 218–219
Versatility of oxidation catalysts for industrial air pollution control. J. H. Houdry and C. T. Hayes. 7(3) 182–186
Visual clarity in kiln discharge gases. S. C. Hayes, N. M. McGrane, and D. B. Perlis. 5(3) 171–172
Waste disposal without air pollution. C. R. Compton and F. R. Bowerman. 10(1) 54–57

5. METHODS OF MEASUREMENT (sampling, detection, evaluation, techniques, testing)

Achieving greater sensitivity in source sampling by the S-N modification to the high volume air sampler. M. Sterling and S. Nimlin. 11(4) 151–154
Adaptation of titrilog for field mobile sampling. S. B. Carpenter and R. E. Sparkman. 5(4) 195–196
The adhesion of solid particles to solid surfaces, I. M. Corn. 11(11) 523–528
The adhesion of solid particles to solid surfaces, II. M. Corn. 11(12) 566–575
Aerosol sampling for electron microscopy. C. E. Billings and L. Silverman. 12(12) 586–590
An air pollution phytotron. D. F. Adams. 11(10) 470–476
Air soiling potential—automatic filter sampling. B. D. Tebbens. 5(4) 233–234
Airborne microorganisms as analytical tools in aerosol studies. T. W. Kethley, C. Orr, Jr., E. L. Fincher, and J. M. DallaValle. 7(1) 16–20
Analysis of kraft-mill, sulfur-containing gases with GLC ionization detectors. D. F. Adams, R. K. Koppe, and W. N. Tuttle. 15(1) 31–33
An apparatus for quantitative studies of inhaled aerosol by dosimetric procedure. F. J. Vocci, E. H. Krackow, H. E. Swann, Jr., J. E. Eipper, and T. A. Ballard. 6(2) 69–71
The application of the concentrometer-principle to the determination of aerosols. A. Goetz. 6(2) 72–75
Application of dispersion staining to microscopic identification of settled dust. D. G. Grabar. 12(12) 560–566
Application of gas chromatographic methods for air pollution studies. L. S. Ettre. 11(1) 34–43
Application of infrared spectroscopy to exhaust gas analysis. S. B. Twiss, D. M.

Teague, J. W. Bozek, and M. V. Sink. 5(2) 75–83
Atmospheric fluorometric fluoride analyzer. J. O. Ivie, L. F. Zielenski, M. D. Thomas, and C. R. Thompson. 15 (5) 195–197
Atmospheric sampling for aldehydes and eye irritation in Los Angeles smog—1960. N. A. Renzetti and R. J. Ryan. 11(9) 421–424
An automatic atmospheric fluoride analyzer. D. F. Adams, R. K. Koppe, and H. J. Dana. 9(3) 160–168
An automatic programming filter sampler. G. S. Raynor. 7(2) 122–124
Automation of colorimetric chemical procedures as applied to analytical requirements in air pollution programs. N. S. Zaleiko. 13(11) 531–534
The calibration of smoke density. J. L. Sullivan. 12(10) 474–478
Chemical methodology in auto exhaust studies. J. E. Sigsby, Jr., Lois J. Lage, T. Bellar, and Mary L. Eisele. 12(6) 294–297
Choosing an aerometric data system. R. I. Larsen. 12(9) 423–430
A combustion method for the determination of solvent vapors at low concentrations in air. R. Goldstein, J. Gliksman, and J. H. Elliott. 10(1) 45–53
The compact sequential automatic air sampler. J. B. Gisclard. 12(2) 81–82
A comparison study of various types of ozone and oxidant detectors which are used for atmospheric air sampling. I. Cherniack and R. J. Bryan. 15(8) 351–354
The concurrent determination of sulfur dioxide and nitrogen dioxide in the atmosphere. G. E. Moore, A. F. W. Cole, and M. Katz. 7(1) 25–28
Continuous determination of carbon monoxide and hydrocarbons in air by a modified infrared analyzer. M. B. Jacobs, M. M. Braverman, and S. Hochheiser. 9(2) 110–114
A continuous flow method of determining unburned fuel in automotive exhaust. J. C. Neerman, J. L. Parsons, and F. R. Bryan. 6(1) 38–40
Continuous measurement of oxides of nitrogen in auto exhaust. M. P. Sweeney, D. J. Swartz, G. A. Rost, R. MacPhee, and J. Chao. 14(7) 249–254
Continuous parts per billion recorder for air contaminants. J. P. Strange, K. E. Ball, and D. O. Barnes. 10(6) 423–426
Current thinking on meteorological instrumentation for use in air pollution problems. G. C. Gill, H. Moses, and M. E. Smith. 11(2) 77–82
Demonstration-syringe odor measurement technique. J. F. Byrd. 7(1) 58–59
A design basis for lead dioxide cylinders. H. R. Hickey and E. R. Hendrickson. 15(9) 409–414
Design and performance of an aerosol channel for the synthesis and study of atmospheric reaction products. A. Goetz and T. Kallai. 12(9) 437–443
The design and performance of the aerosol spectrometer. A. Goetz, H. J. R. Stevenson, and O. Preining. 10(5) 378–383
The detection and estimation of parts per billion concentrations of hydrocarbons. M. Feldstein and S. Balestrieri. 15 (4) 177–178
The determination of the fluoride content of natural vegetation. A. A. Nichol, H. M. Benedict, J. L. Byrne, and C. P. McCarty. 6(4) 239–242
The determination of gravimetric pollution concentrations by means of filter papers. E. Kemény. 12(6) 278–281
Determination of organic vapor concentration in air. H. L. Barnebey and W. L. Davis. 7(2) 86–87
Developments in the use of the A.I.S.I. automatic smoke sampler. J. C. Park, D. M. Keagy, and W. W. Stalker. 10 (4) 303–306
Dustfall measurements. A. F. Fisher. 7 (1) 47–50
Dynamic calibration and data interpretation of a light-scattering instrument. P. K. Mueller and R. G. Givens. 11 (12) 576–580
Dynamic irradiation chamber tests of automotive exhaust, part I. A. H. Rose, Jr., R. C. Stahman, and M. W. Korth. 12(10) 468–473
Dynamic irradiation chamber tests of automotive exhaust, part II. J. E. Sigsby, Jr., T. A. Bellar, and Lois J. Lage. 12(11) 522–523
The effects of humidity on the coagulation rate of ammonium chloride aerosols. I. Hayakawa. 14(9) 339–346
Effect of sampling system temperature on total hydrocarbons measurement in auto exhaust. E. A. Houser and R. L. Chapman. 13(11) 535–537
Engine air flow measurements as an aid to automotive exhaust analysis. G. H. Millar and R. Stahman. 6(1) 35–37
Environmental irradiation test facility. A. H. Rose, Jr. and C. S. Brandt. 10 (4) 331–335
Estimation of water soluble chlorides, sulfates, and nitrates in suspended atmospheric dusts. C. Gelman. 7(3) 216–218
Evaluation of absorption sampling devices. L. R. Roberts and H. C. McKee. 9 (1) 51–53
An evaluation of the aerometric probe. P. A. Humphrey. 11(8) 362–363
Evaluation of contact columns for nitrogen dioxide absorption. L. Pierce, Y. Tokiwa, and K. Kishikawa. 15(5) 204–206
Experiments on the calibration of smoke filters. R. E. Waller. 14(8) 323–325
Facilities and techniques for maintaining a controlled fluoride environment in vegetation studies. A. C. Hill, L. G. Transtrum, M. R. Pack, and A. Holloman, Jr. 9(1) 22–27
Field dynamic calibration of SO_2 recording instruments. S. Duckworth, D. Levaggi, and J. Lim. 13(9) 429–434
A field evaluation of the mini-adak II automatic, fluoride air pollutant analyzer. D. F. Adams and R. K. Koppe. 12(4) 164–169
Field experience with the mast ozone recorder. L. Potter and S. Duckworth. 15(5) 207–209
Flame ionization hydrocarbon analyzer. R. A. Morris and R. L. Chapman. 11(10) 467–469
The fractionation of dust fall samples by physical methods. L. J. Sullivan and C. B. Willingham. 7(1) 50–53
Further applications of the limed filter paper technique in fluorine air pollution studies. D. F. Adams. 7(2) 88–91
Further evaluation of glass fiber filters for sampling hydrogen fluoride. M. R. Pack and A. C. Hill. 15(4) 166–167
Gas chromatographic analysis of hydrocarbons in the Los Angeles atmosphere. A. P. Altshuller and T. A. Bellar. 13 (2) 81–87
Gas chromatographic analysis of incinerator effluents. W. N. Tuttle and M. Feldstein. 10(6) 427–429
Improved titrilog sensitivity, part I. J. S. Nader and J. L. Dolphin. 8(4) 336–337
Improved titrilog sensitivity, part II. H. C. McKee and W. L. Rollwitz. 8(4) 338–340
Incinerator testing and test results. F. Rehm. 6(4) 199–203
Discussion of incinerator testing and test results by F. R. Rehm. R. L. Daugherty. 7(2) 118
Author's closure for incinerator testing and test results. F. R. Rehm. 7(2) 118–119
The inhalability of outdoor dust in relation to air sampling network. F. Shanty and W. C. L. Hemeon. 13(5) 211–214
Instrumentation for an ambient air animal exposure project. R. J. Bryan. 13(6) 254–265
Instrumentation for determining size- and mass-distribution of submicron aerosols. A. Goetz and T. Kallai. 12(10) 479–486
Instrumentation for olefin analysis at ambient concentrations. S. W. Nicksic and R. E. Rostenbach. 11(9) 417–420
Investigating inhalation hazard using synthetic radioactive fallout. W. B. Lane. 9(2) 102–104
Isokinetic flow and sampling. J. D. Wilcox. 5(4) 226
A laboratory study of a lead acetate-tile method for the quantitative measurement of low concentrations of hydrogen sulfide. E. F. Gilardi and R. M. Manganelli. 13(7) 305–309
Measurement of automobile exhaust gas hydrocarbons. J. L. Jones, E. A. Schuck, R. W. Eldridge, N. Endow, and F. W. Cranz. 13(2) 73–77
Measurement of diesel engine emissions. H. C. McKee, J. M. Clark, and R. J. Wheeler. 12(11) 516–521
Measurement of ozone concentration. J. H. Horwood. 9(1) 42–43
Measurement of the visibility aspect of air pollution by means of light scattering. A. H. Peterson. 5(4) 212
A method for checking instrument performance at remote sampling sites. R. A. Jutze and R. J. Lewis. 15(7) 323–326
Methods for measuring particle composition in photoactivated aerosols. A. Goetz. 14(6) 213–219
Method for tracing the ground-level distribution of stack gas emissions. G. F. Haines, Jr., W. C. L. Hemeon, and H. Cember. 7(4) 262–265
Methods of generating solid aerosols. L. Silverman and C. E. Billings. 6(2) 76–83
The microscopic identification of atmospheric particulates. W. C. McCrone and M. A. Salzenstein. 12(4) 195–197
Modification of gas sampling apparatus for use in short-term air pollution studies. R. P. Lewis. 14(9) 370–371
Modification to high volume air sampler brushes. F. C. Wadnola. 14(2) 66
Monitoring atmospheric SO_2 employing inverse radioactive tracers. R. L. Bersin, F. J. Brousaides, and C. O. Hommel. 12(3) 129–146
Monitoring of fluoride content of air, water, and vegetation. C. R. McHenry and H. Charles. 11(2) 66–70
Monitoring sulfur dioxide with lead peroxide cylinders. F. W. Thomas and C. M. Davidson. 11(1) 24–27
Multi-cycle and long cycle automatic impinger sampling. W. J. Whitsell. 7 (2) 120–121
The nature of some model photochemical aerosols. N. Endow, G. J. Doyle, and J. L. Jones. 13(4) 141–147
New equipment and techniques for sampling chemical process gases. W. F. Patton and J. A. Brink, Jr. 13(4) 162–166
A new tool for air pollution control: the aerosol particle counter. W. R. Zinky. 12(12) 578–583

Nitrogen dioxide detection using a coulometric method. R. E. Rostenbach and R. G. Kling. 12(10) 459–463

Odor determination techniques for air pollution control. C. W. Gruber, G. A. Jutze, and N. A. Huey. 10(4) 327–330

Olfactometry: its techniques and apparatus. J. F. Mateson. 5(3) 167–170

The operation and use of the titrilog and the autometer. J. E. Dickinson. 6(4) 224–227

The optical evaluation of smoke or particulate matter collected on filter paper. H. P. Sanderson and M. Katz. 13(10) 476–482

The overall variability of COH unit values and methods for increasing the accuracy of readout. W. E. Hale and N. E. Waggoner. 12(7) 322–323

Ozone analysis with the mini-adak II. D. F. Adams. 13(2) 88–90

Particle size distribution of settled dust. J. H. Fairweather, A. F. Sidlow, and W. L. Faith. 15(8) 345–347

Photodynamic bioassay of polycyclic atmospheric pollutants. S. S. Epstein, M. Small, E. Sawicki, and H. L. Falk. 15(4) 174–176

Plastic containers for sampling and storage of atmospheric hydrocarbons prior to gas chromatographic analysis. C. A. Clemens and A. P. Altshuller. 14(10) 407–408

Preliminary design investigation of controlled environment systems for air pollution studies. H. Buchberg and K. W. Wilson. 8(4) 285–292

A preliminary evaluation of gas air tracers. G. F. Collins, F. E. Bartlett, A. Turk, S. M. Edmonds, and H. L. Mark. 15(3) 109–112

Problems in judging plume opacity—a simple device for measuring opacity of wet plumes. J. E. Yocom. 13(1) 36–39

Procedures in sampling and handling auto exhaust. R. D. Fleming, B. Dimitriades, and R. W. Hurn. 15(8) 371–374

Procedure for calibrating a continuous NO_2 Analyzer. A. T. Rossano, Jr. and H. B. H. Cooper. 13(11) 518–523

Procedure for measuring odor concentration in air and gases. E. A. Fox and V. E. Gex. 7(1) 60–61

Proportional sampling system for the collection of an integrated auto exhaust gas sample. J. C. Chipman and M. T. Massey. 10(1) 60–69

Quantitative determination of formaldehyde in the parts per hundred million concentration level. G. R. Lyles, F. B. Dowling, and V. J. Blanchard. 15(3) 106–108

Quantitative odor measurement. J. L. Mills, R. T. Walsh, K. D. Luedtke, and L. K. Smith. 13(10) 467–475

Rank odor method for evaluating stack gases. G. B. Nichol. 7(1) 55

A rapid general purpose centrifuge sedimentation method for measurement of size distribution of small particles—apparatus and methods. K. T. Whitby. 5(2) 120–126

A rapid method for the determination of sulfur in fuel oil by the Schoniger oxygen flask method. D. A. Levaggi and M. Feldstein. 13(8) 380

A rapid and sensitive colorimetric reagent for nitrogen dioxide in air. N. A. Lyshkow. 15(10) 481–484

Recommendations for day-to-day monitoring of atmospheric pollution control effectiveness. TI-5 committee (APCA). 11(8) 387–399

A recommended method for soiling index surveys by automatic filter paper sampler. C. E. Schumann and C. W. Gruber. 10(6) 436–440

Recommended standard methods for continuing air monitoring for fine particulate matter. TR-2 air pollution measurements committee (APCA). 13(9) 397–404

Recommended standard methods for continuing air monitoring for gaseous contaminants. TR-2 air pollution measurements committee (APCA). 15(7) 313

Recommended standard method for continuing air monitoring for hydrogen sulfide ultramicrodetermination of sulfides in the air. TR-2 air pollution measurements committee (APCA). 15(7) 314–315

Recommended standard method for continuing dustfall survey (APM 1-a). Air pollution measurements committee (APCA). 5(3) 177–181

Recommended units of expression for air pollution. F. P. Terraglio, J. P. Sheely, and R. M. Manganelli. 8(3) 220–222

Reconnoitering the air: procedures for analyzing local air pollution concentrations and contributions. J. H. Smith. 11(2) 57–59

A reliable low cost instrument for determining atmospheric oxidant levels. R. V. Doughty and D. O. Erisman. 11(9) 428–430

Research and test facilities of the Los Angeles County air pollution control district. S. S. Griswold, A. A. Atkisson, R. E. Neligan, F. Bonamassa, and W. Linville. 13(3) 112–115

Sampling atmospheric fluorides with glass fiber filters. M. R. Pack, A. C. Hill, and H. M. Benedict. 13(8) 374–377

Sampling for airborne radioactivity. J. M. Heslep and A. W. Bellamy. 5(1) 1–4

Sampling and mass spectrometer analysis of reaction products from the photochemical decomposition of various olefins. W. B. Barlage, Jr. and F. C. Alley. 15(5) 235–238

Sampling station and time requirements for urban air pollution surveys—IV. W. W. Stalker, R. C. Dickerson, and G. D. Kramer. 12(8) 361–375

A search for some nitro-olefins in polluted air. E. R. Stephens and M. A. Price. 15(7) 320–322

Semi-automated analysis of fluoride in biological materials. L. H. Weinstein, R. H. Mandl, D. C. McCune, J. S. Jacobson, and A. E. Hitchcock. 15(5) 222–225

A simplified method for determining ozone levels in community air pollution surveys. T. Vega and C. J. Seymour. 11(1) 28–33

Simplified method of calibrating SO_2 gas analyzers in the parts per million range. E. R. Kuczynski. 13(9) 435–436

Size distribution of sulfate aerosols in the ambient air. J. F. Roesler, H. J. R. Stevenson, and J. S. Nader. 15(12) 576–579

Size distribution studies with the aerosol spectrometer. F. L. Ludwig and E. Robinson. 15(3) 102–105

Spectrographic trace analysis of air-borne particulates. M. M. Braverman, F. A. Masciello, and V. Marsh. 11(9) 408–409

Spectrophotometric analysis of aldehydes in the Los Angeles atmosphere. A. P. Altshuller and S. P. McPherson. 13(3) 109–111

Studies of the gas chromatographic determination of mercaptans. M. Feldstein, S. Balestrieri, and D. A. Levaggi. 15(5) 215–217

Studies on the analysis of hydrocarbons from incinerator effluents with a flame ionization detector. M. Feldstein. 12(3) 139–141

Studies on coagulation employing ammonium chloride aerosols. I. Hayakawa. 12(6) 265–271

A study of dustfall on the basis of replicated Latin square arrangements of various types of collectors. H. P. Sanderson, P. Bradt, and M. Katz. 13(10) 461–466

A survey for improved methods for the measurement of particulate concentration in flowing gas streams. (Informative report no. 1.) TA-5 committee (APCA). 13(11) 558–563

Techniques of testing for air contaminants from combustion sources. C. V. Kanter, R. G. Lunche, and A. P. Fudurich. 6(4) 191–198

A test procedure for motor vehicle exhaust emissions. G. C. Hass and M. L. Brubacher. 12(11) 505–509

Trace addition of nitric oxide and nitrogen dioxide to air by electrolysis. P. Hersch and R. Deuringer. 13(11) 538–541

The use of adhesive-coated paper for estimating incinerator particulate emissions. C. W. Gruber and C. E. Schumann. 12(8) 376–378

Use of plants for air pollution monitoring. E. F. Darley. 10(3) 198–219

The use of sticky paper in an air pollution monitoring program. C. W. Gruber and G. A. Jutze. 7(2) 115–117

Vegetation symptoms as a measure of air pollution. H. C. McKee and F. W. Bieberdorf. 10(3) 222–225

A versatile, high flowrate tape sampler. J. S. Nader. 9(1) 59–62

6. SURVEY RESULTS AND INTERPRETATION

The AEC fallout monitoring network. M. Eisenbud. 6(3) 144–146

The ASHAE air-borne dust survey. K. T. Whitby, A. B. Algren, R. C. Jordan, and J. C. Annis. 7(3) 157–165

Airborne radioactivity surveying: U.S.A. F. W. Stead. 6(3) 147–150

Analysis of smoke observations at Ottawa, Canada. R. E. Munn and C. R. Ross. 11(9) 410–416

An assessment of community air quality. R. L. Stockman and P. W. Hildebrandt. 13(6) 268–271

Atmospheric ozone in northern Greenland. H. C. McKee. 11(12) 562–565

Calculating air quality and its control. C. E. Zimmer and R. I. Larsen. 15(12) 565–572

Cincinnati's radioactive fallout monitoring program. C. W. Gruber and C. E. Schumann. 13(5) 195–197

Comparative study of oxidants for the Los Angeles atmosphere. N. A. Renzetti and J. C. Romanovsky. 6(3) 154–158

Comparison of auto exhaust emissions in two major cities. A. H. Rose, Jr., R. Smith, W. F. McMichael, and R. E. Kruse. 15(8) 362–366

Comprehensive area surveys in New York State. C. S. Maneri and W. H. Megonnell. 10(5) 374–376

The concentration of ozone in the atmosphere of certain American cities. J. Cholak, L. J. Schafer, and D. W. Yeager. 5(4) 227–232

Contaminant concentrations in the atmosphere of Los Angeles County. W. J. Hamming, R. D. MacPhee, and J. R. Taylor. 10(1) 7–16

The continuous air monitoring program. G. A. Jutze and E. C. Tabor. 13(6) 278–280

Design and interim meteorological evaluation of a community network for meteorological and air quality measurements. J. M. Leavitt, F. Pooler, Jr., and R. C. Wanta. 7(3) 211–215

The estimation of air pollution emissions in a regional air pollution control district. W. R. Crouse, G. D. Aase, H. C. Johnson, J. D. Coons, and J. E. Yocom. 10(4) 285–291

Evaluation of air pollution data. L. C. McCabe, W. Machle, and D. P. Barnes. 14(4) 107–109

Discussion of "Evaluation of air pollution data." V. H. Sussman. 14(4) 110–111

Comments on "Evaluation of air pollution data." J. J. Schueneman. 14(4) 112

An evaluation of continuous air quality data. C. E. Zimmer and G. A. Jutze. 14(7) 262–266

The hydrocarbon content of urban air—a six month survey. L. Dubois, R. G. Reynolds, T. Teichman, and J. L. Monkman. 14(8) 295–298

Identification of community odor problems by use of an observer corps. S. W. Horstman, R. F. Wromble, and A. N. Heller. 15(6) 261–264

Improving the dynamic response of continuous air pollutant measurements with a computer. R. I. Larsen, F. B. Benson, and G. A. Jutze. 15(1) 19–22

The inhalability of outdoor dust in relation to air sampling network. F. Shanty, and W. C. L. Hemeon. 13(5) 211–214

Initial experiences with the comprehensive to air sampling network. F. Shanty New York. R. D. Cusumano, J. T. Wendt, and G. L. Wasser. 13(6) 281–289

Investigation to determine the possible need for a regulation on organic compound emissions from stationary sources in the San Francisco Bay area. H. C. Wohlers and M. Feldstein. 15 (5) 226–229

The joint city, county, state and federal study of air pollution in Louisville. A. T. Rossano, Jr. 6(3) 176–180

Meaningful air quality measurements on a limited budget. F. A. Bell, Jr. 13(3) 127–131

Meteorological instruments for air pollution surveys. TA-8 meteorological committee (APCA). 15(6) 278–280

Methodology for evaluating the air pollution problems of a state. D. M. Keagy, P. A. Kenline, E. R. Hendrickson, and R. O. McCaldin. 8(2) 153–159

Monitoring for air-borne radioactive materials at Hanford Atomic Products Operation. J. K. Soldat. 10(4) 265–270

Nashville sulfur dioxide emission inventory and relationship of emission to measured sulfur dioxide. W. W. Stalker, P. A. Kenline, and H. J. Paulus. 14 (11) 469–474

National motor vehicle contaminant control requirements. A. A. Atkisson, Jr. 12(5) 234–243

Nitric oxide and nitrogen dioxide concentrations near the ground at Menlo Park, California. M. D. Thomas and G. A. St. John. 8(3) 234–239

Nitric oxide and nitrogen dioxide in the Los Angeles atmosphere. L. H. Rogers. 8(2) 124–128

The occurrence, distribution and significance of photochemical air pollution in the United States, Canada, and Mexico. J. T. Middleton and A. J. Haagen-Smit. 11(3) 129–134

Particulate pollutants in the air of the United States. C. E. Zimmer, E. C. Tabor, and A. C. Stern. 9(3) 136–143

Comments on "Particulate pollutants in the air of the United States." W. A. Quebedeaux, Jr. 9(3) 144

Planning an environmental survey for a nuclear power plant site. P. J. Barry. 11(1) 14–18

Procedures for making an inventory of air pollution emissions. A. T. Rossano, Jr. and N. E. Schell. 8(2) 147–152

Program for the survey of lead in three urban communities. D. R. Diggs, H. E. Hesselberg, J. H. Ludwig, and J. A. Maga. 13(5) 228–232

Public health service national fallout surveillance program. J. C. Villforth. 13(5) 222–227

The radial distribution of sulfur dioxide source strength and concentration in Nashville. R. I. Larsen, W. W. Stalker, and C. R. Claydon. 11(11) 529–534

Relationships between 24-hour mean air quality measurements and meteorological factors in Nashville, Tennessee. D. B. Turner. 11(10) 483–489

Results of five years' operation of the national gas sampling network. E. C. Tabor and Catherine C. Golden. 15 (1) 7–11

Results of three years of operation of the national air sampling network. A. C. Stern. 7(4) 284–288

Role of the meteorological engineer in community air pollution surveys. S. R. Frank and R. E. Kerr, Jr. 8(4) 314–327

Sampling station and time requirements for urban air pollution surveys, part I. D. M. Keagy, W. W. Stalker, C. E. Zimmer, and R. C. Dickerson. 11(6) 270–280

Sampling station and time requirements for urban air pollution surveys, part II. W. W. Stalker and R. C. Dickerson. 12(3) 111–128

Sampling station and time requirements for urban air pollution surveys, part III. W. W. Stalker and R. C. Dickerson. 12(4) 170–178

Some measurements of oxidant levels at remote California sites. W. K. Harrison, Jr. and J. P. Lodge, Jr. 8(4) 341–345

Sydney: Potential Los Angeles of the southern hemisphere. J. L. Sullivan. 12(9) 431–436

Total air pollution emissions in Los Angeles County. R. L. Chass, P. S. Tow, R. G. Lunche, and N. R. Shaffer. 10 (5) 351–366

Variation of different pollutants in the atmosphere of Mexico City. A. H. Bravo. 10(6) 447–449

7. THE LAW AND AIR POLLUTION
(legislation, administration, enforcement, standards, programs)

Abstracts of recent legal decisions relating to air pollution. Legal committee (APCA). 8(3) 273–277

Abstracts of recent legal decisions relating to air pollution. Legal committee (APCA). 8(4) 346

Abstracts of recent legal decisions relating to air pollution. Legal committee (APCA). 9(2) 92–93

Abstracts of legal decisions relating to air pollution. Legal committee (APCA). 9(3) 169

Abstracts of legal decisions relating to air pollution. Legal committee (APCA). 11(10) 477–478

Abstracts of legal decisions relating to air pollution. Legal committee (APCA). 11(11) 535

Administration of local air pollution control programs (salaries and qualifications of personnel). M. Sterling. 12 (11) 531–538

Administration of state air pollution control programs, a survey. R. E. Hatchard. 12(6) 282–284

Air pollution administrative trends—the Canadian scene. H. A. Belyea. 14 (12) 500–502

Air pollution control program grants—the first year of experience. C. D. Yaffe. 15(9) 403–408

The air pollution disaster-prevention program of Los Angeles County. R. L. Chass, M. Pratch, and A. A. Atkisson. 8(1) 72–80

Air pollution-potential advisory service for industrial zoning cases. M. Breivogel, S. S. Griswold, A. Hasegawa, and J. R. Taylor. 11(7) 327–335

Air pollution problems and control programs in the United States. J. J. Schueneman. 13(3) 116–125

Ambient air standards. W. L. Faith. 12 (7) 315–316

Application of air quality standards to a community problem. B. D. Tebbens and D. H. Hutchison. 11(2) 53–56

Australian air pollution legislation. J. L. Sullivan. 15(9) 429–432

Bases and criteria for air quality standards. J. R. Goldsmith. 14(1) 22–26

Basic constitutional issues in air pollution control law. N. V. Olds. 13(4) 175–178

Basis for criteria and standards. A. C. Stern. 15(6) 281–283

The biological scientist in an air pollution control program. H. A. James. 10 (6) 450–452

Calculating air quality and its control. C. E. Zimmer and R. I. Larsen. 15(12) 565–572

The California control program for motor vehicle created air pollution. D. Clarkson and J. T. Middleton. 12(1) 22–28

The clean air act and its implications for training requisite personnel. M. Bender. 15(12) 573–575

Community approach to air pollution control: the role of the control official. S. S. Griswold. 13(5) 220–221

Considerations in setting standards for oxides of nitrogen. J. A. Maga. 15 (12) 561–564

The control officer as an advocate. S. S. Griswold. 13(8) 378–379

Current trends in federal interagency relations concerning air pollution. R. Perman and L. Goldner. 15(10) 472–475

Development, calibration and use of a plume evaluation training unit. J. D. Coons, H. A. James, H. C. Johnson, and M. S. Walker. 15(5) 199–203

Development of an improved smoke inspection guide. A. H. Rose, Jr., J. S. Nader, and P. A. Drinker. 8(2) 112–116

The development of motor vehicle exhaust emission standards in California. J. A. Maga and G. C. Hass. 10(5) 393–396

A dynamic air resource management program, city of Chicago. J. V. Fitzpatrick and A. N. Heller. 15(7) 297–301

Emission standards for the control of solid particles; a new approach by New Jersey. L. A. Winkelman. 14(11) 441–444

Establishment of an intercommunity air pollution control program. G. A. Jutze and C. W. Gruber. 12(4) 192–194

Field evaluation of an improved smoke inspection guide. A. H. Rose, Jr. and J. S. Nader. 8(2) 117–119

Fifty years of air pollution law. H. W. Kennedy. 7(2) 125–141

The formulation and adoption of reasonable rules and regulations. H. W. Kennedy. 13(7) 328–333

Future outlooks for the development and application of air quality standards. V. G. MacKenzie. 14(1) 19–21

Graduate education for air pollution control personnel. E. R. Hendrickson. 9(3) 133–135

Guidelines for inspection procedures of motor vehicle air pollution emissions. TA-10 vehicular exhaust committee (APCA). **14**(8) 326

Industrial zoning as a means of controlling area source air pollution. W. D. Holland, A. Hasegawa, J. R. Taylor, and E. K. Kauper. **10**(2) 147–155

An inspection method for automobile hydrocarbon emission. R. L. Chapman. **10**(6) 463–464

Legal aspects of state versus local control. H. W. Kennedy. **11**(7) 318–326

Legal considerations involved in the establishment of ambient air quality standards. F. L. Seamans. **12**(4) 198–200

Legal problems of interjurisdictional air pollution control. S. Edelman. **13**(7) 310–313

The limitations of air quality standards. R. A. Kehoe. **14**(1) 16–18

Local air pollution control programs—a survey and analysis. H. C. Ballman and T. J. Fitzmorris. **13**(10) 486–495

Meteorological considerations in air quality planning. J. M. Leavitt. **10**(3) 246–250

A method for analyzing the trend in visibility. G. C. Holzworth and J. A. Maga. **10**(6) 430–435

A method for determining source reduction required to meet air quality standards. R. I. Larsen. **11**(2) 71–76

The new federal clean air act. V. G. MacKenzie. **14**(9) 385–387

New York State's classifications-ambient air quality objectives system. A. Rihm, Jr. **15**(11) 519–522

Odor pollution problems from the control official's viewpoint. C. W. Gruber. **7**(1) 56–57

Organization and administration of interjurisdictional air pollution control programs. M. S. Walker. **13**(8) 370–373

Performance budgeting for the public health service air pollution program. R. Perman. **14**(2) 43–47

Performance standards in zoning. E. E. Schulze. **10**(2) 156–160

Place of performance standards in planning and zoning regulations. W. T. Ingram. **12**(2) 62–63

A practical air pollution control district approach. J. H. Fairweather. **12**(8) 384–387

The preference for state level enforcement. R. E. Hatchard. **11**(4) 187–188

Problems in judging plume opacity—a simple device for measuring opacity of wet plumes. J. E. Yocom. **13**(1) 36–39

Prosecution of air pollution cases under common law nuisance. W. A. Quebedeaux, Jr. **12**(4) 187–191

The province of Ontario's air pollution control program. W. B. Drowley. **15**(9) 419–421

Punched card information retrieval system for air pollution control data. H. A. James and Harriet Currie. **14**(4) 118–122

Radiological program of the Los Angeles County air pollution control district. A. Wiley and P. S. Tow. **10**(1) 88–91

Recent trends in federal legislation on air pollution. B. Jones. **14**(5) 152–153

A review and appraisal of air pollution legislation in the United States. S. M. Rogers. **7**(4) 308–315

The role of an air pollution advisory board. S. Calvert. **14**(6) 234–237

Standards for air quality in California. J. A. Maga and J. R. Goldsmith. **10**(6) 453–455

Status of control of motor vehicle emissions in California. D. A. Jensen and E. P. Grant. **14**(12) 483–486

Summary of existing air pollution standards. A. C. Stern. **14**(1) 5–15

Tailoring the air-pollution ordinance to community needs. A. Stern. **5**(3) 151–152

Text of public law 89-272: the clean air act amendment. **15**(12) 597–600

Use of air quality standards in local or area control programs. H. J. Dunsmore. **14**(8) 320–322

The use of air quality standards in state air pollution control programs. A. Rihm, Jr. **14**(8) 309–310

Use of air quality standards in state air pollution control programs. W. A. Munroe. **14**(8) 315–319

Why air pollution control should be enforced at a local level. C. E. Couchman. **11**(4) 173–174

8. CREATING A CLIMATE FOR CONTROL
(public relations, management concepts)

Air pollution administrative control—a local responsibility. G. E. Best. **11**(4) 155–156

Air pollution control is good business. W. R. Bradley. **9**(2) 115–119

Air pollution as related to civilian defense. F. Kraissl, Jr. **11**(11) 536–539

Co-operating for cleaner air. A. J. Benline. **12**(6) 291–293

Fifty years backward and forward in air pollution control. B. Linsky. **8**(4) 347–351

History of the air pollution control association. W. G. Christy. **10**(2) 126–142

Industrial planning for air pollution control. H. H. Meredith, Jr. **15**(12) 594–596

Industrial responsibilities in and advantages from the control of air pollution. M. D. Barr. **10**(3) 226–233

International moves abet understanding of air pollution control problems. J. H. Fairweather. **15**(10) 490–491

Methodology for the study of public attitudes concerning air pollution. Jane Schusky, L. Goldner, S. Z. Mann, and W. C. Loring. **14**(11) 445–448

A practical relationship between government and industry. D. P. Barnes. **15**(10) 465–466

Public health responsibilities in air pollution. D. Bergsma. **6**(2) 103

Public policy issues in air conservation. J. P. Dixon. **14**(5) 149–151

Public reaction to air pollution in Nashville, Tennessee. W. S. Smith, J. J. Schueneman, and L. D. Zeidberg. **14**(10) 418–423

Public relations for the APCA member. J. M. Von Bergen. **7**(4) 320–324
